the end of the section there are Practice Problems more problems similar to the You Try It problems but given all at once Finally each section has Challenge Problems these lean to being equally or a bit more difficult than the others and they allow students to check on what they ve mastered My goal is to keep the students engaged with the text and so the writing style is very informal with attempts at humor along the way Because we have large engineering and meteorology programs at my institution and they make up the largest portion of our Calculus students naturally then these sorts of STEM students are the target audience
