the design integration and operation of AHU systems tailored for battery manufacturing cleanrooms and dry rooms. It offers insights into the complex requirements of these environments, from the maintenance of ultra low humidity levels in dry rooms to the strict particulate control needed in cleanrooms. Throughout the book, readers will find practical guidance on selecting and optimizing AHU systems, troubleshooting common issues, ensuring energy efficiency, and maintaining compliance with industry regulations. The book also discusses future trends and innovations in AHU technology, including automation, AI integration, and sustainability efforts, highlighting how these advancements will shape the future of critical environments. Whether you are a facility manager, HVAC engineer, or involved in the design and maintenance of critical environments, this book provides the knowledge and tools necessary to optimize AHU systems and ensure the highest standards of operation. The focus on battery manufacturing cleanrooms and dry rooms emphasizes the unique challenges faced by industries operating in these high precision environments, making it an indispensable resource for professionals dedicated to achieving excellence in these fields.
