Hallenbeck,2003-07-03 Drawing from his extensive clinical experience and many years of teaching Dr Hallenbeck has written a guide to palliative care for clinicians Topics addressed range from an overview of death and dying to specific approaches to symptom management As an introduction to both the art and science of palliative care this book reflects the perspectives of one physician who has dedicated his career to this rapidly evolving field the book links real stories of illness with practical advice thereby delineating clinical practice in a way that reflects the daily concerns of clinicians *The Oxford Textbook of Palliative Social Work* Terry Altilio,Shirley Otis-Green,John G. Cagle,2022 It is so important to advocate for things that may not always seem possible Getting to work with patients families at the end of their life is the ultimate honor Lauren G Markham MSW LCSW APHSW C In this work one witnesses both depths of human suffering and heights of human transcendence that can inspire both awe and fear At those times I have found that surrendering my need to be an expert and instead allow myself to simply be a human is the wisest action Kerry Irish LCSW OSW C FAOSW *Improving Palliative Care for Cancer* National Research Council,Commission on Life Sciences,Institute of Medicine,National Cancer Policy Board,2001-07-15 It is innately human to comfort and provide care to those suffering from cancer particularly those close to death Yet what seems self evident at an individual personal level has by and large not guided policy at the level of institutions in this country There is no argument that palliative care should be integrated into cancer care from diagnosis to death But significant barriers attitudinal behavioral economic educational and legal still limit access to care for a large proportion of those dying from cancer and in spite of tremendous scientific opportunities for medical progress against all the major symptoms associated with cancer and cancer death public research institutions have not responded In accepting a single minded focus on research

toward cure we have inadvertently devalued the critical need to care for and support patients with advanced disease and their families This report builds on and takes forward an agenda set out by the 1997 IOM report Approaching Death Improving Care at the End of Life which came at a time when leaders in palliative care and related fields had already begun to air issues surrounding care of the dying That report identified significant gaps in knowledge about care at the end of life and the need for serious attention from biomedical social science and health services researchers Most importantly it recognized that the impediments to good care could be identified and potentially remedied The report itself catalyzed further public involvement in specific initiatives mostly pilot and demonstration projects and programs funded by the nonprofit foundation community which are now coming to fruition Health Assessment Jill Fuller, Jennifer Schaller-Ayers, 1990
