Sea City The Third Helix:

Sea City Gregg Nolan, 2015-02-18 When the imminent death of a far flung planet causes its inhabitants to scatter seedpods throughout the galaxy one of these meteors plummets deep into Earth's ocean floor In time the sea and the stone give birth to aquatic humanoids the first sentient beings on this once lifeless planet and so begins Earth's epic tale of woe Darkening the history of the Aquatics is the ill fated Hyperion the jealous and paranoid prince of the Pacific who in a failed attempt to murder two Aquatics inadvertently gives rise to a new land dwelling life form the mouth breather This marks the first steps of human history Now thousands of years later Earth faces its own impending doom as global warming threatens to submerge the entire planet But this doesn't just spell the end of life for humans The Aquatics are also suffering from the ecological imbalance And if either hopes to survive they must trust each other and work toward a shared future But the long banished Hyperion has been brooding and he may prove to be the supreme danger unless someone can wield the trident stuck in the Sea Stone

Sea City Gregory A. Nolan, 2015 When global warming and pollution cause catastrophic flooding that destroys the balance of power the world leaders unite to build a giant floating city filled with their best scientific minds But only an ancient hidden species from deep under the ocean can stop the annihilation before it's too late They surface to work with the mouth breathers and find out that they are more alike than either would ever admit Provided by publisher

Smart Cities Mark Deakin, 2013-08-22 Smart city development has emerged a major issue over the past 5 years Since the launch of IBM's Smart Planet and CISCO's Smart Cities and Communities programmes their potential to deliver on global sustainable development targets have captured the public's attention However despite this growing interest in the development of smart cities little has as yet been published that either sets out the state of the art or which offers a less than subjective arm's length and dispassionate account of their potential contribution This book brings together cutting edge research and the findings from technical development projects from leading authorities within the field to capture the transition to smart cities It explores what is understood about smart cities paying particular attention on the governance modelling and analysis of the transition that smart cities seek to represent In paving the way for such a representation the book begins to account for the social capital of smart communities and begins the task of modelling their embedded intelligence through an analysis of what the embedded intelligence of smart cities contributes to the sustainability of urban development This innovative book offers an interdisciplinary perspective and shall be of interest to researchers policy analysts and technical experts involved in and responsible for the planning development and design of smart cities It will also be of particular value to final year undergraduate and postgraduate students interested in Geography Architecture and Planning

Beware of smart people! Redefining the smart city paradigm towards inclusive urbanism Stollmann, Jörg, Wolf, Konrad, Brück, Andreas, Frank, Sybille, Million, Angela, Misselwitz, Philipp, Schlaack, Johanna, Schröder, Carolin, 2016-11-30 The Smart City paradigm aims at resource efficient urban development by means of ICT implementation Cities where we

work and conduct our research are building Smart City strategies and that research institutions increasingly fund research into the development of smart infrastructure and Smart Cities are considered a radical paradigm shift and motors of technological innovation economic growth higher quality of life efficiency and risk control in the face of shrinking resources and impending climate change This smartification is contrasted by increasing calls by civil society and urban social movements for more encompassing inclusion in decision making New urban actors are acquiring agency through situated knowledge local expertise social networking and cooperation and collaboration skills Behind these movements a seemingly parallel discourse to the Smart City paradigm is gaining ground the discourse of the commons Commons are defined as the combination of resources people and practices resources which are defined and managed by a group of people of commoners and a practice of commoning that looks after takes care for and fosters this resource without exhausting it Commoning is a practice that seems closer than any other practice to a sustainable way of life Are these two discourses the discourse on the Smart City and the discourse on the urban commons irreconcilable antagonists or do they share a common ground which needs to be uncovered developed and advocated This question is by no means merely theoretical It is also a very practical question which pertains to the management and distribution of the resources we depend on It is a very political question as it demands negotiation and the taking of sides And it is an ethical question in that it relates to how we respect and stand up for each other our fellow human beings and also the non human nature for which we are responsible The essays and transcripts of the symposium Beware of Smart People want to make a first contribution and stimulate future research in the field Das Paradigma der Smart City ist Ausdruck der Ambition Stadtentwicklung durch die Anwendung von IKT effizient und Ressourcen schonend zu gestalten St dte in denen wir arbeiten und ber die wir forschen entwickeln Smart City Strategien und Forschungsf rderung spezialisiert sich zunehmend auf die Entwicklung smarter Infrastrukturen und Steuerungsmechanismen Smart Cities werden als radikaler Paradigmenwechsel gelesen und als Motoren technologischer Entwicklung konomisches Wachstum h here Lebensqualit t Effizienz und Risikokontrolle angesichts abnehmender Ressourcen und drohenden Klimawandels Dieser Smartifizierung stehen die zunehmenden Forderungen zivilgesellschaftlicher Gruppen und sozialer Bewegungen f r mehr und umfassendere Einbindung in Entscheidungsprozesse entgegen Neue urbane Akteure werden zu Agenten indem sie ihre Erfahrungswissen ihre lokalen Kenntnisse ihre sozialen Netzwerke und F higkeiten zur Kooperation und Kollaboration einbringen Hintergrund diese Bewegungen ist ein augenscheinlich paralleler Diskurs zur Smart City welcher sich zunehmend Geh r verschafft der Diskurs ber die Gemeing ter die Commons Commons werden definiert als das Zusammenspiel von Ressourcen Menschen und Praktiken Ressourcen die von einer Gemeinschaft den Commonern definiert und verwaltet werden und eine Praxis des Commoning welche die Ressource schonend bewirtschaftet ohne sie zu verbrauchen In diesem Sinne scheint Commoning eine Praxis die einer nachhaltigen Lebensweise am n chsten kommt Sind diese zwei Diskurse der Diskurs ber die Smart City und jener ber die

urbanen Gemeing ter unvereinbare Antagonisten oder teilen sie Gemeinsamkeiten welche offen gelegt weiter entwickelt und verfechtet werden sollten Diese Frage ist keineswegs eine rein theoretische Sie ist eine sehr praktische Frage da sie auf das die Verteilung und das Management lebenswichtiger Ressourcen zielt Sie ist eine politische Frage da sie Auseinandersetzung und Parteinahme einfordert Und sie ist eine ethische Frage denn sie fordert gegenseitigen Respekt und Einsatz ein f r unsere Mitmenschen sowie f r die nichtmenschliche Natur f r die wir Verantwortung tragen Die Texte und Aufzeichnungen des Symposiums Beware of Smart People wollen hierzu einen Beitrag leisten und zuk nftige Forschungsvorhaben stimulieren
