Bodies, Technologies and Methods Phil Jones,2020-04-14 This book examines how different technologies can be used to enhance research methods in the social sciences and humanities The boundary between the body and the digital has become increasingly blurred in recent years due to the rise of technologies that capture and reshape our embodied selves New technologies all too often reflect the attitudes of the privileged white men who dominate the tech sector This book thus in part considers how critical researchers can employ new technologies while challenging some of the problematic assumptions that underpin their design It also includes a series of case studies that examine the dynamic use of different techniques to explore key questions around the intersection of embodiment and the digital With a playful experimental approach to conducting research today this book offers new cutting edge methods that respond to the potential of different technologies It will be invaluable reading for undergraduate and post graduate students of social sciences and humanities to explore ways in which this approach can bring new insights to a range of interdisciplinary research questions

The State of Conservation Joshua Nygren,2025-01-06 In the twentieth century natural resource conservation emerged as a vital force in US politics laying the groundwork for present day sustainability Merging environmental agricultural and political history Joshua Nygren examines the political economy and ecology of agricultural conservation through the lens of the conservation industrial complex This evolving public private network which united the US Department of Agriculture Congress local and national organizations and the agricultural industry guided soil and water conservation in rural America for much of the century Contrary to the classic tales of US environmental politics and the rise and fall of the New Deal Order this book emphasizes continuity Nygren demonstrates how the conservation policies programs and partnerships of the 1930s and 1940s persisted through the age of environmentalism and how their defining traits anticipated those typically associated with late twentieth century political culture The conservation industrial complex promoted a development oriented brand of conservation that aided the rise of large scale capital intensive agriculture which continues today It also reshaped the physical and political landscapes of the country leading to impressive conservation victories and spectacular failures by privileging some environments degrading others and intensifying farm depopulation In the name of environmental protection agricultural conservation made rural America less equal
