Literaturverz S 414 459 Science Education in Canada Christine D. Tippet,Todd M. Milford,2019-07-01 This book offers a meso level description of demographics science education and science teacher education Representing all 13 Canadian jurisdictions the book provides local insights that serve as the basis for exploring the Canadian system as a whole and function as a common starting point from which to identify causal relationships that may be associated with Canada s successes The book highlights commonalities consistencies and distinctions across the provinces and territories in a thematic analysis of the 13 jurisdiction specific chapters Although the analysis indicates a network of policy and practice issues warranting further consideration the diverse nature of Canadian science education makes simple identification of causal relationships elusive Canada has a reputation for strong science achievement However there is currently limited literature on science education in Canada at the general level or in specific areas such as Canadian science curriculum or science teacher education This book fills that gap by presenting a thorough description of science education at the provincial territorial level as well as a more holistic description of pressing issues for Canadian science education *OECD Economic Surveys: Brazil 2020* OECD,2020-12-16 The COVID 19 pandemic has caused severe human suffering and triggered a deep recession in Brazil Economic policies reacted in a timely and decisive manner to the crisis supporting millions of Brazilians But a strong and inclusive recovery from the recession will require long lasting improvements in economic policies Improving fiscal outcomes remains one of Brazil s principal challenges given a high debt burden to which the pandemic has added significantly Public spending will need to become more efficient including by building on past progress in the fight against corruption and economic crimes Social protection can be strengthened through a better focus on the most effective policies and benefits which could allow significant reductions in inequality and poverty Stronger growth will hinge on raising productivity which has been virtually stagnant for decades This requires addressing underlying policy challenges including reducing regulatory burdens reforming taxes strengthening judicial efficiency and fostering a stronger integration into the global economy Raising productivity implies reallocations and structural changes in the economy which should be accompanied by well designed training and education policies Training with a strong focus on local skill demand can help workers master the transition and seize new opportunities to move into better jobs
