Snakes on a spaceship—An overview of python in space physics Angeline G. Burrell, John Coxon, K.-Michael Aye, Leslie Lamarche, Sophie A Murray, 2023-07-20 **The Mathematics Playbook** John Almarode, Kateri Thunder, Michelle Shin, Douglas Fisher, Nancy Frey, 2024-01-28 This is a playbook about teaching and learning mathematics It is not just focused on the content skills procedures conceptual understandings and application of mathematics but the teaching and learning of mathematics in our schools and classrooms From counting to conic sections patterns to permutations radii to rational equations and fractions to fractals the questions we aim to answer include 1 How do we foster nurture and sustain mathematics learning 2 How do we approach the teaching and learning of mathematics to ensure all learners have equity of access and opportunity to the highest level of mathematics learning possible 3 What are the non negotiables in a high quality mathematics task 4 How do we know if learners really get it These are the questions the authors strive to address in this playbook The Art of Collectivity Jennifer Beth Spiegel, Benjamin Ortiz Choukroun, 2019-09-12 Amidst epidemics of youth alienation and cultural polarization community based artistic practices are sprouting up around the world as antidotes to policies of austerity and social exclusion Rejecting the radical individualism of the neoliberal era many artistic projects promote collectivity and togetherness in navigating challenges and constructing shared futures The Art of Collectivity is about how one such creative social program deployed this approach in service of a post neoliberal vision Focusing on a national social circus initiative launched by a newly elected Ecuadorean government to help actualize its citizens revolution the book explores the intersection between global cultural politics participatory arts collective health and social transformation The authors include scholars and practitioners of community arts humanities social sciences and health sciences from the Global North and Global South Sensitive to hierarchical binaries such as research practice north south and art science they work together to provide a multifaceted analysis of the way cultural politics shape policy pedagogy and aesthetic sensibilities as well as their socio cultural and health related effects The largest study of social circus to date combining detailed quantitative qualitative and arts based research The Art of Collectivity is a timely contribution to the study of cultural policies critical pedagogies collective art making and community development **Cancer, Radiation Therapy, and the Market** Barbara Bridgman Perkins, 2017-08-16 Appraising cancer as a major medical market in the 2010s Wall Street investors placed their bets on single technology treatment facilities costing 100 300 million each Critics inside medicine called the widely publicized proton center boom crazy medicine and unsustainable public policy There was no valid evidence they claimed that proton beams were more effective than less costly alternatives But developers expected insurance to cover their centers staggeringly high costs and debts Was speculation like this new to health care Cancer Radiation Therapy and the Market shows how the radiation therapy specialty in the United States later called radiation oncology coevolved with its device industry throughout the twentieth century Academic engineers and physicians acquired financing

to develop increasingly powerful radiation devices initiated companies to manufacture the devices competitively and designed hospital and freestanding procedure units to utilize them In the process they incorporated market strategies into medical organization and practice Although palliative benefits and striking tumor reductions fueled hopes of curing cancer scientific research all too often found serious patient harm and disappointing beneficial impact on cancer survival This thoroughly documented and provocative inquiry concludes that public health policy needs to re evaluate market driven high tech medicine and build evidence based health care systems

Creating Engaging Discussions Jennifer H. Herman, Linda B. Nilson, 2023-07-03 If you have ever been apprehensive about initiating classroom discussion fearing silences the domination of a couple of speakers superficial contributions or off topic remarks this book provides strategies for creating a positive learning experience Jennifer H Herman and Linda B Nilson demonstrate how to create the conditions to facilitate deep and meaningful learning as well as to assess the effectiveness of discussions They identify analyze and solve common problems in both classroom and online discussions and in both small and large classes They take a direct practice oriented approach that in acknowledging common challenges provides principles guidance on design examples of activities and techniques and eight detailed case studies These cases demonstrate successful approaches that faculty across disciplines and from a variety of institutions have adopted in their face to face blended or online courses at the undergraduate or graduate level The case authors begin by describing the original pedagogical challenge they faced and explain how they addressed it and assessed the results of their innovation They also offer practical recommendations to readers who may want to try their strategies Intended for faculty this book will be equally valuable for educational developers who can use this resource in their programs and private consultations At the graduate level this book can serve as a text or workshop resource in college teaching courses and teaching assistant development programs The final chapter provides a set of resources and activities including discussion questions on the case studies writing prompts and jigsaw formats that are equally appropriate for individual study or for use in workshop environments You ll never again have to suffer such a profound silence that as described by a contributor to the book she could hear the crickets chirping outside

Mother of Invention Katrine Marçal, 2021-10-19 An illuminating and maddening examination of how gender bias has skewed innovation

technology and history now in paperback It all starts with a rolling suitcase Though the wheel was invented some 5 000 years ago and the suitcase in the 19th century it wasn't until the 1970s that someone successfully married the two What was the holdup For writer and journalist Katrine Mar al the answer is both shocking and simple because real men carried their bags no matter how heavy Mother of Invention is a fascinating and eye opening examination of business technology and innovation through a feminist lens Because it wasn't just the suitcase Drawing on examples from electric cars to tech billionaires Mar al shows how gender bias stifles the economy and holds us back delaying innovations sometimes by hundreds of years and distorting our understanding of our history While we talk about the Iron Age and the Bronze Age we might as well talk about the Ceramic Age or the Flax Age since these technologies were just as important But inventions associated with women are not considered to be technology in the same way as those associated with men Mother of Invention is a sweeping tour of the global economy with a powerful message If we upend our biases we can unleash our full potential **Advances in Traffic**
