Gender and Climate Change Joane Nagel, 2025-08-05

Does gender matter in global climate change This timely and provocative book takes readers on a guided tour of basic climate science then holds up a gender lens to find out what has been overlooked in popular discussion research and policy debates We see that around the world more women than men die in climate related natural disasters the history of science and war are intimately interwoven masculine occupations and preoccupations and conservative men and their interests drive the climate change denial machine We also see that climate policymakers who embrace big science approaches and solutions to climate change are predominantly male with an ideology of perpetual economic growth and an agenda that marginalizes the interests of women and developing economies The book uses vivid case studies to highlight the often surprising gendered impacts of climate changes This new edition is a thorough update that includes revised and new chapters and new material that takes account of the significant advances in climate research environmental and social theory and the many political and

social challenges posed in the wake of US elections Covid 19 pandemic and rapidly changing climate and environment The new edition also takes account of important social and cultural movements that resist challenges to women s rights and advocate for gender sexuality and racial justice This book will appeal to students researchers and academicians interested in environmental studies and gender studies It also will be of interest to policymakers activists and others involved with environmental policy and governance

High-Table Diplomacy Kjell Engelbrekt,2016-06-10 The proliferation of minilateral summits is reshaping how international security problems are addressed yet these summits remain a poorly understood phenomenon In this groundbreaking work Kjell Engelbrekt contrasts the most important minilateral summits the G7 formerly G8 and G20 with the older and more formal UN Security Council to assess where the diplomacy of international security is taking place and whether these institutions complement or compete with each other Engelbrekt s research in primary source documents of the G7 G8 G20 and UN Security Council provides unique insight into how these institutions deliberate on three policy areas conflict management counterterrorism cooperation and climate change mitigation Relatively informal and flexible GX diplomacy invites more countries to take a seat at the table and allows nontraditional security threats to be placed on the agenda Engelbrekt concludes however that there is a continuing need for institutions like the UN to address traditional security problems High Table Diplomacy will provoke discussion and further research on the role of
