The Professional Development of Teachers: Practice and Theory Philip Adey,2007-05-08 Hopkins Bruce Joyce Michael Huberman Matthew Miles and Virginia Richardson But we have chosen to present our own experience and empirical data first and then in Part 3 to show how this experience and data relates to models which have been proposed by others We will address here methodological issues concerned with collecting and interpreting evidence of relationships amongst the many individual and situational factors associated with PD and re visit the arguments about process product research on PD In the light of our experience we will interrogate models of PD which have been proposed by others and attempt to move forward our total understanding of the process of the professional development of teachers for educational change In conclusion we will look at some current national practice in professional development concentrating on the recent English experience of introducing strategies into schools but referring also by way of contrast to the situation in the United States WHAT S THE PROBLEM Why has the professional development of teachers already exercised so many good minds for so long And how can we justify adding another book to this field The answer to both questions must lie in the continuing demand from society in general at least as interpreted by politicians and newspaper editors for improvements in the quality of education

Non-Linear Perspectives on Teacher Development Kathryn J. Strom,Tammy Mills,Linda Abrams,2023-03-21 Despite the multifaceted complexity of teaching dominant perspectives conceptualize teacher development in linear dualistic transactional human centric ways The authors in this book offer non linear alternatives by drawing on a continuum of complex perspectives including CHAT complexity theory actor network theory indigenous studies rhizomatics and posthuman neomaterialisms The chapters included here illuminate how different ways of thinking can help us better examine how teachers learn relationally with human material and discursive elements and offer ways to understand the entangled nature of the relationship between that learning and what emerges in classroom instructional practice They also present situated illustrations of what those entanglements or assemblages look like in the preservice induction and inservice phases from early childhood to secondary settings and across multiple continents Authors provide evidence that research on teacher development should focus on process as much if not more than product and show that complexity perspectives can support forward thinking assets based pedagogies Methodologically the chapters encourage conceptual creativity and expansion and support an argument for blurring theory method and normalising methodological hybridity Ultimately this book provides conceptual theoretical and methodological tools to understand current educational conditions in late capitalism and imagine otherwise It was originally published as a special issue of the journal Professional Development in Education Resources in Education ,2001 *Current Index to Journals in Education* ,2002 **Canadian Books in Print.
