, 1923 **Habits of Mind** William Barclay Allen, Carol M. Allen, a compelling synthesis that clears away much of the intellectual clutter in strategic planning and offers a creative if somewhat elitist theory that fuses the strengths of the university with the context and challenges of the 21st century Choice Habits of Mind maintains that the fact that almost everyone now goes to college need not be seen as an obstacle to excellence in education Some critics have insisted that college is not for everyone but William B Allen and Carol Allen assert that the college diploma has rightly become as much

the norm in this century as the high school diploma was during the twentieth century Accordingly it is essential that higher education remains true to its deepest purpose the cultivation of proficient humanity The authors see the key to this goal as the development of judgment or habits of mind Habits of mind are far and away the most influential determinants of human conduct and nowhere are they more profoundly shaped than in institutions of higher education Furthermore liberal education has proven most effective in this undertaking The authors elaborate on the purpose of higher education and identify the chief obstacles to achieving its aim They demonstrate the critical role of academic leaders in achieving the aim of higher education and posit that excellence in judgment is the primary characteristic of the academic leaders who fulfill this role They examine three aspects of access to higher education academic readiness the cost and funding of higher education and the capacity of the physical plant Finally they use policies developed in Virginia to demonstrate realistic approaches to achieving the aims of access and quality discussed throughout the book The authors draw on their years of experience as practitioners in both private and public institutions liberal arts colleges and research universities to develop their material This volume will be of interest to faculty and students in higher education programs nation and state public policymakers legislative and academic leaders and a general public concerned about the cost and value of a college education William B Allen is professor of political science and director of the program in public policy and administration at Michigan State University He is author of *The Federalist Papers A Commentary* and *Let the Advice be Good A Defense of Madison s Democratic Nationalism* Carol M Allen is a research specialist in the Department of Political Science Michigan State University and a free lance editor She has published articles on literacy cooperative collection development and library systems implementation The goal of higher education as described by Allen and Allen is based on a curriculum of study for a proficient humanity characterized by excellence in judgement The authors have presented a refreshing treatise on the values of education respect for working toward a more civilized society acknowledgement of human dignity and the need for more moral and fair treatment within our society Higher education is positioned to contribute to these lofty ideals and is described very well in this book Alton L Taylor University of Virginia
