Understanding Sponsored Search Jim Jansen, 2011-07-25 This book addresses the underlying foundational elements both theoretical and methodological of sponsored search As such the contents are less affected by the ever changing implementation aspects of technology Rather than focusing on the how this book examines what causes the how Why do certain keywords work while others do not Why does that ad work well when others that are similar do not Why does a key phrase cost a given amount Why do we measure what we do in keyword advertising This book speaks to that curiosity to understand why we do what we do in sponsored search The content flows through the major components of any sponsored search effort regardless of the underlying technology or client or product The book addresses keywords ads consumers pricing competitors analytics branding marketing and advertising integrating these separate components into an incorporated whole The focus is on the critical elements with ample illustrations and with enough detail to lead the interested reader to further inquiry

Internet and Network Economics Xiaotie Deng, Fan Chung Graham, 2007-12-03 This book constitutes the refereed proceedings of the Third International Workshop on Internet and Network Economics WINE 2007 held in San Diego CA USA in December 2007 The contents were carefully reviewed and selected The papers are organized in topical sections on equilibrium information market sponsored auction network economics mechanism design social networks advertisement pricing computational general equilibrium network games and algorithmic issues

Search Engine Freedom Joris van Hoboken, 2012-10-01 In this book the author explores how search media can be incorporated into freedom of expression doctrine as well as media and communications law and policy more generally And the book develops a

theory of the legal relations between national governments and search media providers on the one hand and between end users and information providers on the other Among the many issues covered are the following role of government under the right to freedom of expression lack of transparency about the ranking and selection of search results search engine and ISP intermediary liability filtering by access providers freedom of expression and the governance of public libraries the search engine market its business model and the separation rule for advertising search engine self regulation user profiling and personalization decisions and actions for which search engines should be able to claim protection The analysis draws on specific legal developments under Article 10 of the European Convention on Human Rights and the United States First Amendment and investigates issues of diversity pluralism and freedom of expression as they relate to editorial control in other media The author concludes with recommendations regarding search engine governance and the proper role of government indicating which existing elements of the regulatory framework for search media can be improved and offering directions for future legal and empirical research Considering the ever growing cultural political and economic importance of the Internet and the World Wide Web in our societies and the societal interests involved in the availability of effective search tools this first in depth legal analysis of search engine freedom will prove indispensable to the many practitioners and policymakers concerned with freedom of expression in the digital age

Innovative Mobile and Internet Services in Ubiquitous Computing Leonard Barolli,Fatos Xhafa,Nadeem Javaid,Tomoya Enokido,2018-06-07 This book presents the latest research findings methods and development techniques related to Ubiquitous and Pervasive Computing UPC as well as challenges and solutions from both theoretical and practical perspectives with an emphasis on innovative mobile and internet services With the proliferation of wireless technologies and electronic devices there is a rapidly growing interest in Ubiquitous and Pervasive Computing UPC UPC makes it possible to create a human oriented computing environment where computer chips are embedded in everyday objects and interact with physical world It also allows users to be online even while moving around providing them with almost permanent access to their preferred services Along with a great potential to revolutionize our lives UPC also poses new research challenges

Channel Strategies and Marketing Mix in a Connected World Saibal Ray,Shuya Yin,2019-12-14 This book aims to revisit the traditional interaction between channel strategies and the marketing mix in a connected world In particular it

focuses on the following four dimensions in this context Consumers Products Value Proposition and Sustainability Keeping in mind the growing digitalization of business processes in the retail world and the move towards omni channel retailing the book introduces the state of the art academic and practitioner studies along these dimensions that could enhance the understanding of the potential impact that new technologies and strategies can have on practice in the near future When launching a new product service to market firms usually consider various components of the marketing mix to influence consumers purchase behaviors such as product design convenience value proposition promotions sustainability initiatives etc This mix varies depending on the specific channel and consumer niche that the firm is targeting But this book shows how channel strategy also influences the effectiveness in utilizing the marketing mix to attract potential customers

Algorithms and Models for the Web-Graph Anthony Bonato,Fan R.K. Chung,2007-11-15 This book constitutes the refereed proceedings of the 5th International Workshop on Algorithms and Models for the Web Graph WAW 2007 held in San Diego CA USA in December 2007 colocated with WINE 2007 the Third International Workshop on Internet and Network Economics The 13 revised full papers and five revised short papers presented were carefully reviewed and selected from a large pool of submissions for inclusion in the book The papers address a wide variety of topics

Information Overload Judith B. Strother,Jan M. Ulijn,Zohra Fazal,2012-10-02 This book covers the ever increasing problem of information overload from both the professional and academic perspectives Focusing on the needs of practicing engineers and professional communicators it addresses the causes and costs of information overload along with strategies and techniques for reducing and minimizing its negative effects The theoretical framework of information overload and ideas for future research are also presented The book brings together an international group of authors providing a truly global point of view on this important rarely covered topic

Social Information Retrieval Systems: Emerging Technologies and Applications for Searching the Web Effectively Goh, Dion,Foo, Schubert,2007-10-31 The wealth of information accessible on the Internet has grown exponentially since its advent This mass of content must be systemically sifted to glean pertinent data and the utilization of the collective intelligence of other users or social information retrieval is an innovative emerging technique Social Information Retrieval Systems Emerging Technologies covering topics such as social tagging collaborative querying social network analysis subjective relevance judgments and collaborative filtering Answering the increasing demand for authoritative resources on Internet technologies this Premier Reference Source will make an indispensable addition to any library collection

From Net Neutrality to ICT Neutrality Patrick Maillé,Bruno Tuffin,2022-11-05 This book discusses the pros and cons of information and communication ICT neutrality It tries to be as objective as possible from arguments of proponents and opponents this way enabling readers to build their own opinion It presents the history of the ongoing network neutrality debate the various concepts it encompasses and also some mathematical developments illustrating optimal strategies and potential counter intuitive results then extends the discussion to connected ICT domains The book

thus touches issues related to history economics law networking and mathematics After an introductory chapter on the history of the topic chapter 2 surveys and compares the various laws in place worldwide and discusses some implications of heterogeneous rules in several regions Next chapter 3 details the arguments put forward by the participants of the net neutrality debate Chapter 4 then presents how the impact of neutral or non neutral behaviors can be analyzed mathematically with sometimes counter intuitive results and emphasizes the interest of modeling to avoid bad decisions Chapter 5 illustrates that content providers may not always be on the pro neutrality side as there are situations where they may have an economic advantage with a non neutral situation e g when they are leaders on a market and create barriers to entry for competitors Another related issue is covered in chapter 6 which discusses existing ways for ISPs to circumvent the packet based rules and behave non neutral without breaking the written law Chapter 7 gives more insight on the role and possible non neutral behavior of search engines leading to another debate called the search neutrality debate Chapter 8 focuses on e commerce platforms and social networks and investigates how they can influence users actions and opinions The issue is linked to the debate on the transparency of algorithms which is active in Europe especially Chapter 9 focuses on enforcing neutrality in practice through measurements indeed setting rules requires monitoring the activity of ICT actors in order to sanction non appropriate behaviors and be proactive against new conducts The chapter explains why this is challenging and what tools are currently available Eventually Chapter 10 briefly concludes the presentation and opens the debate
