resource for those teachers and educators who want to include an integrated and layered approach to their teaching. Additionally, the author has included important educational principles like global citizenship, sustainability, and taking action, social aspect. The book covers most of the trending aspects of integrated learning. It is surely a great resource for teachers, educators, and parents who want to combine an organic, natural approach, papermaking with technology, circuits, and computer programming. Keywords: Papermaking, paper drying, paper pulp, couching, paper press, circuitry, copper adhesive, tape, LED's, batteries, mould and deckle, microprocessor, Arduino Uno, Micro bit, BBC Picaxe, Raspberry Pi, computational books, pop up card making, greeting card making, nets, sustainability, taking social action, global citizenship, fair trade, paint techniques, STEM Education, STEAM Education, ESSSTEAM Education, Blockly, Chibitronics. Brief outline with some details of this book: This book will introduce and cover the basics of making handmade paper from recycled paper. The basic tools and equipment required for papermaking are covered. The steps of how to make a sheet of paper are included. Ideas like greeting cards, pop up cards, wrapping paper, and more are explored and explained. Techniques like adding seeds, doing printing on the paper, colouring, and scenting the paper to name a few will be discussed. From a teaching perspective, the underlying value of these activities will be investigated. For parents and educators, several layers of integrated learning are included in this resource. STEAM (Science, Technology, Engineering, Art, and Mathematics) is explored in the process of papermaking, and the integration of these subject areas is illustrated. The following areas will also be touched on: namely, global citizenship, sustainability, taking action for the environment, taking social action, entrepreneurship, business opportunities, accounting, and more. These areas are very relevant to teaching in a modern day context. It is practical and focuses on cutting edge educational practice to date. These layered and integrated aspects will provide a rich educational approach to project based learning. It includes creating and selling handmade greeting cards with and without circuitry. Additionally, some very creative techniques for adding value and fun to the papermaking process are introduced. For example, dyes for papermaking, colouring, different paper textures, choice of materials, scented paper, and exploring different fibres. The last section of the book includes pop up greeting card making. The goal is to plan the papermaking, colours, and textures etc. for pop up card making as a second activity. From a scientific and electronics perspective, electrical circuits to the pop up card will be introduced. For example, led lights, microprocessors, buzzers, switches, and more. Finally, the basic programming of microprocessors will be discussed. The microprocessor will be programmed to light up led lights, make buzzers go, and more. User friendly interfaces like Micro bit, Arduino Uno, Picaxe, Arduino LilyPad, and Raspberry Pi are discussed towards the end of the book.
