Parallel Population and Parallel Human Proposes a new paradigm to investigate an individual s cognitive deliberation in dynamic human machine interactions Today intelligent machines enable people to interact remotely with friends family romantic partners colleagues competitors organizations and others Virtual reality VR augmented reality AR artificial intelligence AI mobile social media and other technologies have been driving these interactions to an unprecedented level As

the complexity in system control and management with human participants increases engineers are facing challenges that arise from the uncertainty of operators or users

Parallel Population and Parallel Human A Cyber Physical Social Approach presents systemic solutions for modeling analysis computation and management of individuals cognition and decision making in human participated systems such as the MetaVerse With a virtual real behavioral approach that seeks to actively prescribe user behavior through cognitive and dynamic learning the authors present a parallel population human model for optimal prescriptive control and management of complex systems that leverages recent advances in artificial intelligence Throughout the book the authors address basic theory and methodology for modeling describe various implementation techniques highlight potential acceleration technologies discuss application cases from different fields and more In addition the text Considers how an individual s behavior is formed and how to prescribe their behavioral modes Describes agent based computation for complex social systems based on a synthetic population from realistic individual groups Proposes a universal algorithm applicable to a wide range of social organization types Extends traditional cognitive modeling by utilizing a dynamic approach to investigate cognitive deliberation in highly time variant tasks Presents a new method that can be used for both large scale social systems and real time human machine interactions without extensive experiments for modeling

Parallel Population and Parallel Human A Cyber Physical Social Approach is a must read for researchers engineers scientists professionals and graduate students who work on systems engineering human machine interaction cognitive computing and artificial intelligence

Cognitive Movement Ecology Eliezer Gurarie, Tal Avgar, 2024-02-09 At least since Darwin argued that the difference in cognitive abilities between animals and humans is one of degree and not of kind the study of animal cognition has been an active and dynamic subfield of behavioral sciences It has however been based almost entirely on experimental studies of animals in captivity and belongs as a field more snugly in the realm of Psychology or Ethology with relatively little application to understanding the behavior of animals in the wild Movement Ecology in contrast is a more recent branch of Ecology devoted almost entirely to the analysis of animal movements in the wild Technological developments allow for animals to be tracked in the wild in ever increasing numbers precision and duration Movement ecology has to some extent chased the data reflecting the practical need to analyze and interpret those data Much of the most important developments of recent decades are devoted to dealing with the trickier aspects of the statistical analysis of movement data which in their multidimensionality autocorrelation gappiness and measurement error and behavioral complexity pose no shortage of hairy statistical problems
