Erotic Bird Maurice Natanson, 2021-09-14 How does literature illuminate the way we live Maurice Natanson a prominent

champion of phenomenology draws upon this method's unique power to show how fiction can highlight aspects of experience that are normally left unexamined. By exploring the structure of the everyday world, Natanson reveals the uncanny that lies at the core of the ordinary. Phenomenology, which involves the questioning of that which we usually take for granted, is for Natanson the essence of philosophy. Drawing upon his philosophical predecessors Edmund Husserl, Alfred Schutz, and Jean Paul Sartre, Natanson paves his own way with stories and examples that themselves bear witness to how phenomenology occurs in literature. In considering such works as Samuel Beckett's *Waiting for Godot*, Thomas Mann's *The Magic Mountain*, and Franz Kafka's *The Metamorphosis*, Natanson shows how literature opens us to the domain of possibility and how metaphor offers philosophical power when we think about freedom and change. This book, written by one of the twentieth century's leading phenomenologists, will interest students in philosophy and in literature. They will value the work particularly for its clarification of concepts and terms that frequently emerge in the contemporary intellectual climate. **Mental**

Health Crisis in Higher Education Aloka, Peter, 2023-12-29 The COVID-19 pandemic brought about a sudden transition from traditional face-to-face instruction to online and blended learning. The repercussions of this seismic change have left an indelible mark on students, particularly those thrust into the challenging realm of fully engaging in online learning during this tumultuous period. As we navigate the delicate landscape of higher education post-pandemic, a critical gap in scholarly literature becomes glaringly apparent: there is a scarcity of focused works addressing the nuanced well-being of students in this new academic reality. *Mental Health Crisis in Higher Education* is a groundbreaking book that boldly steps into this void, offering a comprehensive and meticulously researched examination of the challenges faced by students transitioning from secondary to higher education amid the pandemic. By delving into stressors, coping mechanisms, and the intricate web of factors influencing emotional, psychological, and physical well-being, the book is an invaluable resource for academics, researchers, and institutions seeking to understand and address the multifaceted dimensions of student well-being. **The**

Plurality of Power Sarah Cowie, 2011-02-15 How do people experience power within capitalist societies? Research presented here explicitly addresses the notion of pluralistic power, which encompasses both productive and oppressive forms of power, and acknowledges that nuanced and multifaceted power relations can exist in combination with binary dynamics such as domination and resistance. This volume addresses growing interests in linking past and present power relationships engendered by capitalism and in conducting historical archaeology as anthropology. *The Plurality of Power: Industrial Capitalism and the Nineteenth Century Company Town of Fayette, Michigan* explores the subtle distribution of power within American industrial capitalism through a case study of a company town. Issues surrounding power and agency are explored in regard to three heuristic categories of power. In the first category, the company imposed a system of structural class-based power that is most visible in hierarchical differences in pay and housing, as well as consumer behavior. A second category addresses disciplinary activities surrounding health and the human body as observed in the built environment, medical

artifacts disposal patterns of industrial waste incidence of intestinal parasites and unequal access to healthcare The third ensemble of power relations is heterarcical and entwined with non economic capital social symbolic and cultural Individuals and groups drew upon different forms of capital to bolster social status and express identity both within and apart from the corporate hierarchy The goal in combining these diverse ideas is to explore the plurality of power relationships in past industrial contexts and to assert their relevance in the anthropology of capitalism *Doing Practitioner Research Differently* Marion Dadds,Susan Hart,2002-11-01 Doing Practitioner Research Differently encourages those embarking on practitioner research to consider the validity of innovative methods and styles of reporting The book looks at three methods of enquiry and reporting visualisation conversation and fictional writing Using practitioners own accounts and research reports as case studies this book explores the reasons why some practitioners reject the traditional research methods It looks at the challenges faced by these practitioners and the conditions in higher education that encourage or inhibit innovative practitioner research The case studies used illustrate that there are modes of enquiry and reporting that can foster the development of professional thinking and practice **Culturally Proficient Coaching** Delores B. Morris, Joseph Amaral, 2012-11-14 As a whole the essays in this book address theoretical and empirical issues related to children's learning and cognition. The first essay titled *Learning in Cognitive Niches* treats the process of sense making on a theoretical level discussing the complexity of factors that give rise to children's learning. It is followed by an essay titled *Using the Dynamics of a Person Context System to Describe Children's Understanding of Air Pressure* that applies ideas from complexity science and dynamics systems theory to children's learning about science. The next four essays summarize and synthesize already published findings in an effort to go beyond individual viewpoints and present a more nuanced picture of children's sense making. In particular two of these summaries *Preschoolers Learning Science: Myth or Reality* and *The Emergence of Scientific Reasoning* focus on children's ability to make sense of their physical environment. The essay *Cognition and the Child Witness: Understanding the Impact of Cognitive Development in Forensic Contexts* seeks to shed light on children's sense making relevant to forensic issues. And the essay *Beyond the Black and White of Autism: How Cognitive Performance Varies with Context* ventures in the area of autism, a disorder that demonstrates atypical processes of combining pieces of information. The final two essays provide original data to add to the discussion of what factors affect cognitive functioning. In particular the essay *Cognitive Fitness in Young Adult Video Game Players* seeks to reassess the often assumed relation between video gaming and various aspects of thinking, memory, intelligence, and visual spatial abilities. And the essay *Impact of Moving Away from Home on Undergraduate Metacognitive Development* explicitly connects life circumstances to the ability to monitor and control one's thinking. Together the collection of essays are a further step towards understanding the process of sense making as children and young adults interact with their environment. **Reflective**
