

# MOVIE CRITIQUE

The movie *To Sir with Love*, directed by James Clavel in 1967, deals with vital social issues of the time.

Social class, ethnicity, and gender have always been considered as possible barriers to equality of opportunity in education. This issue is always present in the movie. The main character, Mark, encounters numerous difficulties with employment because of his skin color. Although it seems that being a Negro did not prevent him from getting all-round education and an academic degree, he is not accepted to work anywhere besides low-rate school for difficult children.

There is little evidence of educational inequality conditioned by gender. In Mark's class there are both boys and girls, and the latter seem to be treated as equals. The school provides similar educational environment for both sexes. However, low social status and neglectful attitude of the parents diminishes the children's chances to get good education. East End is considered as inferior to other districts, and the children from local schools have less opportunities than those from more prestigious educational institutions.

The relationship between teachers and students has considerable influence on the students' performance. Teacher's expectations have strong impact on the student's performance. The maturity with which Mark begins to treat the students encourages them to make progress and excites their interest. Trust and tolerance displayed by the teacher and his respect of the student's personalities serve as effective stimuli and improve their academic performance. Individualism and liberty that are often viewed as the main

**Practical Approaches to Teaching Film** Rachel S. Ritterbusch, 2020-07-24 Rachel Ritterbusch's *Practical Approaches to Teaching Film* is a collection of essays focusing on the use of film in settings ranging from an introductory film class to an upper division Women's Studies course. Drawing on their experience in the classroom, contributors to this anthology show how movies can be used to promote critical thinking, create an awareness of the male gaze, challenge dominant ideology, and unmask the constructedness of film. This volume treats a wide variety of film texts from box office hits like *The Da Vinci Code* to underappreciated art films such as Susan Streiffeld's *Female Perversions* from *Ple Moko* and other French classics to more contemporary francophone works like *Chaos* and *Rosetta* from self-reflexive films that interrogate the act of filmmaking itself to those that draw attention to the phallogocentric nature of cinematic apparatus. Common to all these essays is the belief that if used judiciously, film can be a valuable pedagogical tool. Aimed both at those currently teaching film and those wishing to do so, this volume provides practical support in the form of sample syllabi, assignments, and a glossary of film terms.

Platt, Thomas Hofmann, 2007 The annual Neural Information Processing Systems NIPS conference is the flagship meeting on neural computation and machine learning This volume contains the papers presented at the December 2006 meeting held in Vancouver Subjective Well-Being and Social Media Stefano M. Iacus, Giuseppe Porro, 2021-08-04 Subjective Well Being and Social Media shows how by exploiting the unprecedented amount of information provided by the social networking sites it is possible to build new composite indicators of subjective well being These new social media indicators are complementary to official statistics and surveys whose data are collected at very low temporary and geographical resolution The book also explains in full details how to solve the problem of selection bias coming from social media data Mixing textual analysis machine learning and time series analysis the book also shows how to extract both the structural and the temporary components of subjective well being Cross country analysis confirms that well being is a complex phenomenon that is governed by macroeconomic and health factors ageing temporary shocks and cultural and psychological aspects As an example the last part of the book focuses on the impact of the prolonged stress due to the COVID 19 pandemic on subjective well being in both Japan and Italy Through a data science approach the results show that a consistent and persistent drop occurred throughout 2020 in the overall level of well being in both countries The methodology presented in this book enables social scientists and policy makers to know what people think about the quality of their own life minimizing the bias induced by the interaction between the researcher and the observed individuals being language free it allows for comparing the well being perceived in different linguistic and socio cultural contexts disentangling differences due to objective events and life conditions from dissimilarities related to social norms or language specificities provides a solution to the problem of selection bias in social media data through a systematic approach based on time space small area estimation models The book comes also with replication R scripts and data Stefano M Iacus is full professor of Statistics at the University of Milan on leave at the Joint Research Centre of the European Commission Former R core member 1999 2017 and R Foundation Member Giuseppe Porro is full professor of Economic Policy at the University of Insubria An earlier version of this project was awarded the Italian Institute of Statistics Google prize for official statistics and big data **Tracing the Impact of First-Year Writing** Laura Wilder, 2024-11-15

Tracing the Impact of First Year Writing presents the results of a large scale longitudinal study of college writers that explores the impact of a required first year writing course with a comparative approach not previously available Over five years Laura Wilder conducted 143 interviews with and collected 774 pages of writing from 58 students half of whom had taken a new first year writing course and half who had not Wilder found that while in many ways the experiences of both groups are comparable demonstrating how students receive valuable educations in rhetoric and writing from a variety of sources beyond a first year writing course students who took the first year writing course were much more likely to identify as writers This identification supported students use of writing in powerfully generative and knowledge building ways that they carried with them long after the course into other appropriate contexts In contrast to previous longitudinal studies of college writers undertaken at institutions with high prestige and resources Tracing the Impact of First Year Writing explores the role of writing at a regional public university and documents how students experiences with writing can be highly divergent across the curriculum and unequal across campuses Additionally this book includes the voices of students who do not identify as capable writers and have strongly negative emotional reactions to writing and writing instruction and adds empirical support to innovative calls in the field to transform the first year writing course into one that inspires students to reflectively consider writing itself
