

Nursing research problem statement

The purpose of this research is to assess the infection control practices among the nursing staff in Kenyan hospitals at the national level. On top of that, this domestic study works in evaluating attitude and knowledge about infection control among nursing staff in various Kenyan hospitals.

Research Objectives:

- To potentially identify gap between the knowledge of Kenyan nursing staff as well as their infection control practices.
- To assess the practices on infection control in Kenyan hospitals.
- To explore on the relationship between the attitudes of Kenyan nursing staff toward infection control as well as their knowledge with infection control.

Quantitative Research Questions:

Existence of Relationship

- Identifying whether or not there is a relationship in between the experience level, as well as a hand washing practice among staff nurses in Kenyan hospitals.

Nature and Direction of Relationship

- Do Kenyan male nurses perform basic hygienic measures such as washing their hand more often as compared to female nurses?

Strength of Relationship

- How strong is the actual relationship between hand-washing practice and experience?

Qualitative Research Questions:

Process

How has the patient-nurse relationship developed and evolved through time?

Meaning

What does it mean for cancer patient isolation for those who are residing in infection isolated room?

Descriptive

What are the experiences in life for Kenyan HIV positive?

Analysis

There is a huge correlation between the practices of the common staff nurses in hospitals, Kenyan private and public hospitals included, towards the actual hygienic condition and treatment progress among patients. Infection control is something that needs to be taken seriously. The use of infection isolated room is one thing; however there are also other methods that can also be implemented accordingly in order to potentially control the spread of infection among the group of patients being taken care of in hospitals.
