 bada** Ben Morris, Manfred Bortenschlager, Cheng Luo, Michelle Somerville, Jon Lansdell, 2010-10-01 An expert introduction to  
 Samsung s new mobile platform Bada is a new platform that runs on mass market phones and enables you to build cutting  
 edge applications for mobile devices As an access layer bada has all the advantages of native coding and provides the power  
 of multi tasking and multi threading This book serves as a complete introduction to the exciting capabilities of bada and  
 shows you how bada offers commerce and business services with server side support The authors walk you through the  
 complete set of platform APIs and detail the architecture of bada Code fragments are featured throughout the book as well as  
 examples that utilize all of the major APIs from sensors to maps and from phonebook to billing Introduces Samsung s new  
 platform bada Explains the bada framework its APIs and the bada architecture Walks you through how bada is a logically  
 structured mobile platform that allows you to build exciting apps for mobile devices Features code fragments and numerous  
 examples that address all the major APIs Discover how bada boasts the richest set of end to end service commerce and  
 billing APIs with this book *Outlook* ,2008-09-08 Dangerous Technologies Brandaan Huigen, 2025-11-10 Dangerous  
 Technologies focuses on the prevalent theft of consumer electronics in post Apartheid South Africa Through a material  
 culture perspective it explores why these objects have commonly been targeted by bandits and subsequently circulated  
 through the criminal underground The author traces ethnographically how devices travel between various social spheres  
 delving into the experiences of a range of individuals from diverse residents who fall victim to criminals to the bandits who  
 steal electronics for money or drugs the African migrants who export consignments of stolen electronics to their home  
 countries the envious residents who buy stolen electronics and finally the police attempting to grapple with the problem  
 Dangerous Technologies suggests that electronics have widened digital divides between citizens resulting in underground  
 circuits that seek to violently redistribute enviable electronics to low income residents who have not been able to formally  
 participate in electronics consumption and use Due to porous borders the widespread theft and redistribution of electronics  
 do not only stem from internal inequalities within South African society but also from broader disparities across the African  
 continent The book furthers knowledge about how and why particularly modern electronics have precipitated violent  
 property crime in democratic South Africa It is relevant to scholars of social and cultural anthropology particularly those with  
 an interest in material culture digital anthropology and economic and political anthropology as well as criminologists
