*Political Trust and Disenchantment with Politics*, 2014-12-04 That the publics of Western democracies are becoming increasingly disenchanted with their political institutions is part of the conventional wisdom in Political Science This trend is often equated with the expectation that all forms of political attachment and participation show similar patterns of decline Based on empirical underpinnings derived from a range of original and sophisticated comparative analyses from Europe and beyond this collection shows that no such universal pattern of decline exists Nor should it be expected given the diversity of reasons that citizens have to place or withdraw trust and to engage in conventional political participation or in protest Contributors are Christoph Arndt Wiebke Breustedt Christina Eder Manfred te Grotenhuis Alexia Katsanidou Rik Linssen Michael P McDonald Ingvill C Mochmann Kenneth Newton Maria Oskarson Suzanne L Parker Glenn R Parker Markus Quandt Peer Scheepers Hans Schmeets Thoralf Stark and Terri L Towner

**Political Confidence and Democracy in Europe** Christian Schnaudt, 2018-07-09 This book examines the antecedents and consequences of citizens confidence in different political institutions and authorities Its main argument states that a distinction between confidence in representative and regulative institutions and authorities is of crucial importance in order to gain novel insights into the relevance of political confidence for the viability of democratic systems Relying on individual level data from the European Social Survey ESS the author provides empirical evidence that citizens from a total of twenty one European countries make a distinction between confidence in representative institutions and authorities and confidence in regulative institutions and authorities Furthermore the author shows that both types of political confidence emanate from different sources and are associated with varying consequences Overall these findings indicate that confidence in representative and confidence in regulative institutions and authorities establish two qualitatively different types of political confidence each with distinct implications for the functioning and well being of modern democracies

**In Praise of Skepticism** Pippa Norris, 2022 A culture of trust is usually claimed to have many public benefits by lubricating markets managing organizations legitimating governments and facilitating collective action Any signs of its decline are and should be a matter of serious concern Yet In Praise of Skepticism recognizes that trust has two faces Confidence in anti vax theories has weakened herd immunity Faith in Q Anon conspiracy theories triggered insurrection Disasters flow from gullible beliefs in fake Covid 19 cures Madoff pyramid schemes Russian claims of Ukrainian Nazis and the Big Lie denying President Biden s legitimate election Trustworthiness involves an informal social contract by which principals authorize agents to act on their behalf in the expectation that they will fulfill their responsibilities with competency integrity and impartiality despite conditions of risk and uncertainty Skeptical judgments reflect reasonably accurate and informed predictions about agents future actions based on their past performance and guardrails deterring dishonesty mendacity and corruption We should trust but verify Unfortunately assessments are commonly flawed Both cynical beliefs underestimating performance and credulous faith over estimating

performance involve erroneous judgements reflecting cultural biases poor cognitive skills and information echo chambers These conclusions draw on new evidence from the European Values Survey World Values Survey conducted among over 650 000 respondents in more than 100 societies over four decades In Praise of Skepticism warns that an excess of credulous trust poses serious and hitherto unrecognized risks in a world full of seductive demagogues playing on our insecurities lying swindlers exploiting our greed and silver tongued conspiracy theorists manipulating our darkest fears Trust Ben Seyd,2024-03-20 We seem to be living in an age of citizen distrust of social and political elites Distrust is also seen to have numerous negative consequences for our civic and democratic life Yet are western democracies really facing a crisis of trust This book provides an extensive and up to date review of one of the most important topics in contemporary political life It explores the nature and condition of trust today by exploring three key issues What do we mean by trust How far are levels of trust in decline How damaging are the consequences of low trust for effective democratic governance Seyd also considers how trust arises and which factors might explain the declines in trust witnessed recently in many countries Providing evidence from many countries Trust How Citizens View Political Institutions pays particular attention to Britain which has seen a marked decline in public regard for political elites making the country a vital case for identifying the causes and effects of low trust Combining conceptual and empirical analysis the book provides a timely analysis of a central issue in contemporary political debate **Political Representation in France and Germany** Oscar W.
