of providing personality information about clients in mental health settings since the 1940s James Butcher participated in the creation of the Minnesota Multiphasic Personality Inventory MMPI 2 in 1989 which has continued to be one of the most commonly used personality tests in clinical evaluation Over a thousand studies have been conducted on the effectiveness of the MMPI in treatment related assessments Here Butcher and co author Julia Perry explore the MMPI 2 as well as a new assessment tool the Butcher Treatment Planning Inventory BTPI In using psychological evaluation techniques for treatment planning many clinicians incorporate information from a broad base of instruments clinical interview projective testing behavioral data and personal history and do not rely on data from a single source Therefore while this volume focuses on the use of the MMPI 2 and the BTPI in treatment planning it will provide a context not to the exclusion of other measures
