Infrastructure Development and Construction Management J. C. Edison, 2020-10-12 This is a comprehensive book on infrastructure development and construction management. It is written keeping in mind the curricula of construction management programmes in India and abroad. It covers infrastructure development, the construction industry in India, financial analysis of the real estate industry in India, economic analysis of projects, tendering and bidding, contracts and contract management, FIDIC conditions of contract, construction disputes and claims, arbitration, conciliation and dispute resolution, international construction project exports and identifying, analysing and managing construction project risk. Thus, this book covers most of the construction management activities that are carried out at different stages of a construction project. This is an essential book for students of construction management, construction professionals, academicians and researchers.

Project Development in the Solar Industry Albie Fong, Jesse Tippet, 2012-12-05 This book provides an extensive overview of utility scale solar project development and the various tasks required to bring large solar power plants from plans to realities. The various topics have been organized and presented in a way to clearly define important development fundamentals including basic business and legal considerations. The reader is also guided through the more complex aspects of renewable energy development such as how to choose the ideal project site. Further while the book is appropriate for a cover to cover read through it is also designed to be an excellent go to reference. A HANDBOOK FOR RENEWABLE ENERGY DEVELOPMENT Edited by Albie Fong and Jesse Tippet with contributions from Arturo Alvarez Jeffery Atkin William DuFour III Perry Fontana William Hugron Jason Keller Tyler M Kropf Michael Mendelsohn Brett Prior Scott Reynolds Pilar Rodriguez Ib ez Katherine Ryzhaya Poster and Alfonso Tovar. ELECTRONIC ENHANCEMENTS The book's companion website <http://www.solarbookteam.com> provides contact information for all authors to the book and access to the key resources highlighted in the text. Energy and the Environment A. A. M. Sayigh, 2012-12-02 As the governments and peoples of the world come to face the global impact of the technological revolution it is appropriate to consider the future of world energy supplies. This conference approached the task not only of developing the means of tapping renewable energy sources but also of showing renewable energy to be a viable alternative to current harmful sources of energy. Economic and educational problems were addressed along with the scientific ones. The development of alternative energy is of no use if it cannot be made economically viable or if people are not convinced of its advantages.

Hyperlocal Jennifer S. Vey,Nate Storning,2022-10-25 An examination of how the hyper local is the locus of real change Many of America s downtowns waterfronts and innovation districts have experienced significant revitalization and reinvestment in recent years but concentrated poverty and racial segregation remain persistent across thousands of urban suburban and rural neighborhoods The coronavirus pandemic magnified this sustained and growing landscape of inequality Uneven patterns of economic growth and investment require a shift in how communities are governed and managed This shift must take into account the changing socioeconomic realities of regions and the pressing need to bring inclusive economic growth and prosperity to more people and places In this context place based hyperlocal governance structures in the United States and around the globe have been both part of the problem and part of the solution These organizations range from community land trusts to business improvement districts to neighborhood councils However very little systematic research has documented the full diversity and evolution of these organizations as part of one interrelated field Hyperlocal helps fill that gap by describing the challenges and opportunities of place governance The chapters in Hyperlocal explore both the tensions and benefits associated with governing places in an increasingly fragmented and inequitable economic landscape Together they explore the potential of place governance to give stakeholders a structure through which to share ideas voice concerns advocate for investments and co design strategies with others both inside and outside their place They also discuss how place governance can serve the interests of some stakeholders over others in turn exacerbating wealth based inequities within and across communities Finally they highlight innovative financing organizing and ownership models for creating and sustaining more effective and inclusive place governance structures The authors hope to provoke new

thinking among place governance practitioners policymakers private sector leaders urban planners scholars students and philanthropists about how why and for whom place governance matters The book also provides guidance on how to improve place governance practice to benefit more people and places
