Telehealth Ecosystems in Practice Mauro Giacomini, Lacramioara Stoicu-Tivadar, Gabriella Balestra, Arriel Benis, Stefano Bonacina, Alessio Bottrighi, Thomas M. Deserno, 2023-11-15 Telemedicine is a term which covers all remotely provided health services It removes the obstacle of distance and can equalize access to care by means of technology Telemedicine assumed increased importance during the time of pandemic restrictions but despite increased interest progress has been slowed by factors such as cost lack of privacy legislation the reluctance of elderly patients to use ICT and a lack of qualified actors It remains however one of the best solutions to the problems of different levels of healthcare provision and health outcomes across regions This book presents the proceedings of STC2023 a Special Topic Conference STC organized by the European Federation for Medical Informatics EFMI and held from 25 27 October 2023 in Turin Italy These conferences promote research and development in a specific field of biomedical and health informatics and the theme of the 2023 STC was Telehealth Ecosystems in Practice A total of 112 submissions were received for the conference Of these the number of papers selected after a thorough review process was 51 full papers acceptance 59% and 26 posters all of which

are included in these proceedings Topics covered include homecare and telemonitoring televisits teleradiology telerehabilitation data integration and standards embedded decision support systems sensors devices and patient reported outcomes healthbots and conversational agents and AI applications to telehealth Covering a wide range of topics and methods in telemedicine and biomedical informatics the book will be of interest to all those involved in the planning and provision of healthcare **Complex Dynamical Systems in Education** Matthijs Koopmans,Dimitrios

Stamovlasis,2016-02-19 This book capitalizes on the developments in dynamical systems and education by presenting some of the most recent advances in this area in seventeen non overlapping chapters The first half of the book discusses the conceptual framework of complex dynamical systems and its applicability to educational processes The second half presents a set of empirical studies that that illustrate the use of various research methodologies to investigate complex dynamical processes in education and help the reader appreciate what we learn about dynamical processes in education from using these approaches **Big Data in Healthcare** Pouria Amirian,Trudie Lang,Francois van Loggerenberg,2017-09-18 This

book reviews a number of issues including Why data generated from POC machines are considered as Big Data What are the challenges in storing managing extracting knowledge from data from POC devices Why is it inefficient to use traditional data analysis with big data What are the solutions for the mentioned issues and challenges What type of analytics skills are required in health care What big data technologies and tools can be used efficiently with data generated from POC devices This book shows how it is feasible to store vast numbers of anonymous data and ask highly specific questions that can be performed in real time to give precise and meaningful evidence to guide public health policy **Fracking** David E.

Newton,2015-01-16 The use of fracking is a tremendously important technology for the recovery of oil and gas but the advantages and costs of fracking remain controversial This book examines the issues and social economic political and legal aspects of fracking in the United States Hydraulic fracturing of oil and gas wells known commonly as fracking has been in use in the United States for more than half a century In recent years however massive expansion of shale gas fracturing across the nation has put fracking in the public eye Is fracking a win win like its proponents say or are there significant costs and dangers associated with the use of this energy production technology This book examines fracking from all angles addressing the promise of the United States becoming energy independent through the use of the process to tap the massive amounts of natural gas and oil available as well as the host of problems associated with fracking groundwater contamination and increased seismic activity just to mention two that raise questions about the long term feasibility of the process as a source of natural gas The first part of the book provides a historical background of the topic a review of technical information about fracking and a detailed discussion of the social economic political legal and other aspects of the current fracking controversy The second part of the book provides a host of resources for readers seeking to learn even more in depth information about the topic supplying a chronology glossary annotated bibliography and profiles of important individuals and

organizations Written specifically for students and young adults the content is accessible to readers with little or no previous knowledge regarding fracking

Meeting the Challenges to Measurement in an Era of Accountability Henry Braun,2016-01-29 Under pressure and support from the federal government states have increasingly turned to indicators based on student test scores to evaluate teachers and schools as well as students themselves The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests such as in mathematics or English language arts with a focus on grades 4 8 Teachers in these subject areas however constitute less than thirty percent of the teacher workforce in a district Comparatively little has been written about the measurement of achievement in the other grades and subjects This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas with particular attention to their use in the evaluation of teachers and schools in all It addresses traditional end of course tests as well as alternative measures such as portfolios exhibitions and student learning objectives In each case issues related to design and development psychometric considerations and validity challenges are covered from both a generic and a content specific perspective The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research based applications of educational measurement and assessment Edited by leading experts these books are comprehensive and practical resources on the latest developments in the field The Open Access version of this book available at <http://www.taylorfrancis.com> has been made available under a Creative Commons Attribution Non Commercial No Derivatives 4.0 license

Active Learning in College Science Joel J. Mintzes,Emily M. Walter,2020-02-23 This book explores evidence based practice in college science teaching It is grounded in disciplinary education research by practicing scientists who have chosen to take Wieman's 2014 challenge seriously and to investigate claims about the efficacy of alternative strategies in college science teaching In editing this book we have chosen to showcase outstanding cases of exemplary practice supported by solid evidence and to include practitioners who offer models of teaching and learning that meet the high standards of the scientific disciplines Our intention is to let these distinguished scientists speak for themselves and to offer authentic guidance to those who seek models of excellence Our primary audience consists of the thousands of dedicated faculty and graduate students who teach undergraduate science at community and technical colleges 4 year liberal arts institutions comprehensive regional campuses and flagship research universities In keeping with Wieman's challenge our primary focus has been on identifying classroom practices that encourage and support meaningful learning and conceptual understanding in the natural sciences The content is structured as follows after an Introduction based on Constructivist Learning Theory Section I the practices we explore are Eliciting Ideas and Encouraging

Reflection Section II Using Clickers to Engage Students Section III Supporting Peer Interaction through Small Group Activities Section IV Restructuring Curriculum and Instruction Section V Rethinking the Physical Environment Section VI Enhancing Understanding with Technology Section VII and Assessing Understanding Section VIII The book's final section IX is devoted to Professional Issues facing college and university faculty who choose to adopt active learning in their courses The common feature underlying all of the strategies described in this book is their emphasis on actively engaging students who seek to make sense of natural objects and events Many of the strategies we highlight emerge from a constructivist view of learning that has gained widespread acceptance in recent years In this view learners make sense of the world by forging connections between new ideas and those that are part of their existing knowledge base For most students that knowledge base is riddled with a host of naive notions misconceptions and alternative conceptions they have acquired throughout their lives To a considerable extent the job of the teacher is to coax out these ideas to help students understand how their ideas differ from the scientifically accepted view to assist as students restructure and reconcile their newly acquired knowledge and to provide opportunities for students to evaluate what they have learned and apply it in novel circumstances Clearly this prescription demands far more than most college and university scientists have been prepared for
