The over-harvesting of traditional indigenous medicinal plants contributes to the decline of biodiversity in South Africa.

The African potato (*Hypoxis hemerocallidea*) is a natural resource that is widely used as a traditional medicine in South Africa. The use of the plant escalated at the onset of the HIV/AIDS pandemic because it was popularly believed that it cures AIDS. Extensive medical research has shown that it is not a cure for AIDS, although it may have other medicinal properties.

Field research, on the role of which it is harvested, was done in KwaZulu Natal. The results show that more than 40 000 roots are widely harvested every year.

- 3.4.1 Suggest TWO ways in which the African potato can be used sustainably to prevent extinction. (2)
- 3.4.2 Give THREE reasons why biodiversity is important to humans. (3)

QUESTION 4

"Do more than 84% of South Africans really have access to clean, safe drinking water?" Water and Environment minister Edna Moleketi said that, "The reality is that everyone in South Africa has access to water because they are alive. Without water you die. The real question is, do they have access to water that is going to be good for their health and that is a more difficult question to answer".

Write an essay in which you explain how agriculture contribute to the decrease in the quality of water.

Policy-Making in the GCC Neil Quilliam, Mark C. Thompson, 2017-09-11 The GCC is a major player in the post 2011 reordering of the Middle East Despite the rise in prominence of individual Gulf states especially Kuwait Qatar Saudi Arabia and the United Arab Emirates and the growth of the GCC as a collective entity surprisingly little attention has been paid to the actual mechanics of policy making in the region This book analyses the vital role that institutions are coming to play in shaping policy in the Gulf Arab states The research coincides with two key developments that have given institutions new importance in the policy process the emergence of a new generation of leaders in the Gulf and the era of low oil prices Both developments along with dramatic demographic change have compelled state and citizens to re evaluate the nature of the social contract that binds them together Contributors assess the changing relationship between state and citizen and evaluate the role that formal and informal institutions play in mediating such change and informing policy The book shows how academic social and economic institutions are responding to the increasingly complex process of decision making where citizens demand better services and further empowerment and states are obliged to seek wider counsel although wanting to retain ultimate authority With contributions from both academics and practitioners this book will be highly relevant for researchers and policymakers alike

The Report: Oman 2016 Oxford Business Group, 2016-01-12 Oman's GDP grew 4.6% between 2013 and 2014 according to the Oman Central Bank with hydrocarbons the main driver of the economy at almost 50% of GDP Although the dip in oil prices has put pressure on government revenues authorities are pressing ahead with spending plans for the sector particularly in the downstream segment The country's infrastructure expansion plans are also moving forward particularly at the country's three ports as the country seeks to leverage its strategic position on the Strait of Hormuz and establish itself as a global transport and logistics hub Feeding off this development drive are the sultanate's banks with project finance regarded as one of the most promising
