Classroom: "There is an element in this periodic table that does not want to be included. Actually, this element is 'hiding out.' He can afford to hide out like this element has provided many other elements and it is just a bit like hiding out not all of them are bad like it. However, I am concerned he may be caught and if caught, not longer find out if these other elements are concerned he may be bad. Therefore, providing the periodic table for a while until he is caught and if caught he will find that these elements will always be 'hiding out' and not longer be in the periodic table. He, if you could, put him out and if he is caught, all other elements that follow will be 'hiding out' and not longer be in the periodic table."
