

## Troubleshooting Guide

### No power / won't get into programming mode

If you **don't** see connection interface. Make sure (PESIP FUSE) is connected to switched vehicle, nonconstant vehicle, otherwise interruption is on.

### The (PESIP FUSE) controls the power immediately without pressing any buttons on the steering wheel

During programming, press the buttons on the steering wheel fully with the (PESIP) fuse off. Activating the button too early will cause the (PESIP FUSE) to send out a signal even when no buttons are pressed.

### The (PESIP FUSE) controls the radio when on the steering wheel is turned (mostly late 80's early 90's Honda/Acura)

Program fuse (PESIP FUSE) 2 for version 4.1.

### When you't program a new button the previous button does not work

When programming all buttons during programming if you try to program another button, all previous button will be erased. You will have to relearn all previous buttons again.
