**Harvest the Rain** Nate Downey,2010 All the Dirt Rachel Fisher,Heather Stretch,Robin Tunnicliffe,2012-02-15 New farmers experienced growers budding environmentalists and fans of natural organic produce alike are sure to love All the Dirt Filled with beautiful photographs and covering a wide variety of topics from agrofuels and food sovereignty to practical tips about specific tools All the Dirt is the must read how to book about small scale organic farming But beyond the practical applications it is also the inspiring story of three friends who followed their dreams and became successful business partners Authors Rachel Fisher Heather Stretch and Robin Tunnicliffe co owners of Saanich Organics a farmer run local food distributor share entertaining stories of three farmers lives while also providing practical information about how to start a farm They relate their personal and collective experiences as women mothers and farmers through anecdotes and discuss the compelling reasons why Canada needs more organic farmers All the Dirt proves that there is no one right way to start a farm and no single solution to any problem But that by working together farmers can create a resilient agriculture that is vibrant and fun as well as economically viable Rachel Heather and Robin have co owned Saanich Organics since 2002 The business has been featured in numerous publications including the Times Colonist West Jet s Up magazine EAT Magazine and The Province It has also been featured in Island on the Edge a documentary film as well as on CBC radio By working cooperatively to grow and distribute top quality produce the business has earned the respect of the farming community the restaurant community organic consumers and activists Visit Saanich Organics online at [www.saanichorganics.com](http://www.saanichorganics.com) **We Must Begin with the Land** Stephen Hunt,2025-04-29 A polyculture of ideas decolonising reframing and transforming how we think about the things we grow through a social ecology lens *The Immaculate Conception of Data* Kelly Bronson,2022-08-15 Every new tractor now contains built in sensors that collect data and stream it to cloud based infrastructure Seed and chemical companies are using these data and these agribusinesses are a form of big tech alongside

firms like Google and Facebook

*The Immaculate Conception of Data* peeks behind the secretive legal agreements surrounding agricultural big data to trace how it is used and with what consequences Agribusinesses are among the oldest oligopoly corporations in the world and their concentration gives them an advantage over other food system actors Kelly Bronson explores what happens when big data get caught up in pre existing arrangements of power Her richly ethnographic account details the work of corporate scientists farmers using the data and activist hackers building open source data platforms Actors working in private and public contexts have divergent views on whom new technology is for how it should be developed and what kinds of agriculture it should support Surprisingly despite their differences these groups share a way of speaking about data and its value for the future Bronson calls this the immaculate conception of data arguing that this phenomenon is a dangerous framework for imagining big data and what it might do for society Drawing our attention to agriculture as an important new site for big tech criticism *The Immaculate Conception of Data* uniquely bridges science and technology studies critical data studies and food studies bringing to light salient issues related to data justice and a sustainable food system

*Regenerating Cities* Maria Elena Zingoni de Baro, 2022-01-18 This book sets out the discussion on how cities can contribute solutions to some of the challenges the urbanised world is facing such as the pressure of growing populations mitigation of effects of and adaptation to globally changing environmental climate and public health conditions Presenting a detailed explanation of the causes behind the current state of modern cities the book advocates for a paradigm shift to improve the quality of life of ever increasing urban inhabitants whilst nourishing the natural systems that sustain human and non human life in the planet Recognising the precious role that nature plays in the functioning of cities it delves into the study of biophilic design and regenerative development The book argues that these social ecological design approaches can act as catalysts to develop conditions in urban settings that are beneficial for natural and human systems to thrive and flourish both in ecosystem services and social cultural systems This is particularly relevant for the design of new quality precincts or the regeneration of degraded urban spaces to promote health wellbeing and urban resilience A framework is proposed to guide the process of thinking about designing and building healthier more liveable and resilient urban environments that raise the quality of life in cities The method can be used by researchers practitioners urban designers urban planners architects and landscape architects interested in developing their work within a social ecological perspective It can also be used by local governments and agencies to underpin policy making and by educational institutions to prepare graduates with necessary skills to respond to current and future built environment challenges
