Harmes, Patrick Alan Danaher, 2017-10-10 Academics working in contemporary universities are experiencing unprecedented and unsustainable pressure in an environment of hyper performativity metrics and accountability From this perspective the university produces multiple tensions and moments of crises where it seems that there is limited space left for the intrinsic enjoyment arising from scholarly practices This book offers a global perspective on how pleasure is central to the endeavours of academics working in the contemporary university with contributors evaluating the opportunities for the strategic refusal of the quantifying stultifying and stupefying delimiters of what is possible for academic production The aim of this book is to open up spaces for conversation reflection and thought in order to think to be and to do differently pleasurably Contributors rupture the bounds of what is permissible and possible within their daily lives habits and practices As such this book addresses increasingly significant questions What are some of the multiple and different ways that we can reclaim pleasure and enhance the durations and intensities of our passions desires and becoming within the contemporary university How might these aspirations be realised What are the spaces for the pleasurable

production of research that might be opened up How might we reconfigure the neoliberal university to be a place of more affect where desire laughter and joy join with the work that we seek to undertake and the communities whom we serve

day and my fatigue I start pouring out information that will help him lose weight I want to I have to help him I begin to explain one after the other all the mistakes he has made how he lost muscle mass through starvation why he does not lose weight even if he eats very little the role of hormones why diets are not effective the health benefits of losing weight but then I realize this is way too much information all at once All right here s what we ll do Tell me what you like to eat and I ll create a nutritional plan for you From tomorrow you will start to eat as we planned and gradually I will explain to you everything you need to know so that for the rest of your life you ll understand the principles of a fit and healthy body I see the hope in his eyes and a determination to succeed even if he doesn t yet understand much about what he should do He s confident again and I can feel his excitement Suddenly the sadness returns The problem is that from next week we move to another city The company I work for has seasonal vegetable warehouses and the vegetable season here will end this week I really want to do this but it looks like I m going to fail again before I start How many weeks of counselling should I have with you and how much does it cost I know a personal trainer is quite expensive and I don t know if I try to stop him This is not about money He insists and takes cash from his pocket to pay me but I really can t take the money I literally can t I feel like I need some fresh air I say goodbye in a hurry I get in the car and I actually feel overwhelmed by sadness compassion but also admiration for his determination to take on responsibilities for his family and to keep looking for a solution for his own health problems He s got to make it he s got to do it I promise myself I ll do everything I can to help him and find a way to advise him even if he s far away I get home and the kids are all over me wanting to know why I am late I can t talk about it So that s how it started That night I worked to sort out his nutritional plan and to find a solution for the future From the next day he started eating according to my nutritional plan And I started writing every night chapter after chapter covering absolutely everything that he needed to know to get results He left the city and at the end of every week I sent him a new chapter I was working during the day doing workouts and providing nutritional advice as usual but I couldn t wait to get home so I could write some more After the first month he had lost a good few pounds and his self confidence had grown enormously He started posting pictures of himself His previous profile picture was of a wild horse After almost three months he had dropped multiple clothing sizes and was increasing the intensity of his exercises He sent me a message Guess what I have a girlfriend I knew how much it meant to him and I was so happy He d lost some weight his clothes fitted him but this is what was really important his self esteem and self confidence were growing and he was making a huge difference to his overall health Meanwhile his willpower and determination to stick to the nutritional plan and the training programme despite being so far from me his personal trainer inspired me to write my first book on nutrition and training I collected all the chapters I had written and linked and improved them even adding demonstration videos with workouts that could easily be done at home I wouldn t have thought of writing a book before but sometimes when you believe you are inspiring and helping someone else you actually get inspired and help yourself I sent Joe the first copy of my book and can only thank him for allowing me to

meet him and help him Today I want to share with you everything I wrote over this time I know that if you are like Joe you can learn everything you need from my book and you can apply it wherever you are I d be so happy to add you to my list of distance clients who have had impressive results Florin Mihai Personal Trainer *Preventing Muscle Loss* Jenny Smith, AI, 2025-02-12 *Preventing Muscle Loss* addresses the critical issue of sarcopenia or age related muscle loss offering readers an evidence based guide to maintaining strength and vitality throughout life The book emphasizes that muscle loss isn t inevitable highlighting two key strategies resistance exercise and optimal nutrition Intriguingly the book reveals how strength training acts as a potent stimulus for muscle protein synthesis counteracting age related decline Additionally it tackles common misconceptions about protein intake providing practical guidance on incorporating sufficient protein into your diet to support muscle repair and growth The book approaches this topic by first defining sarcopenia and its effects then delves into resistance training providing workout routines for various fitness levels It explores the science behind protein nutrition offering recommendations based on individual needs By focusing on lifestyle interventions the book empowers readers to take control of their health promoting mobility balance and independence as they age Ultimately it provides a plan for integrating these strategies into daily life helping readers overcome barriers to success and lead healthier more active lives
