Reading Programs for Young Adults

Martha Seif Simpson, 2015-11-16 School and public libraries often provide programs and activities for children in preschool through the sixth grade but there is little available to young adults For them libraries become a place for work the place to research an assignment or find a book for a report but the thought of the library as a place for enjoyment is lost So how do librarians recapture the interest of teenagers This just might be the answer Here you will find theme based units such as *Cartoon Cavalcade Log On at the Library Go in Style Cruising the Mall Space Shots Teens on TV* and 44 others that are designed for young adults Each includes a display idea suggestions for local sponsorship of prizes a program game to encourage participation 10 theme related activities curriculum tie in activities sample questions for use in trivia games or scavenger hunts ideas for activity sheets a bibliography of related works and a list of theme related films The units are highly flexible allowing any public or school library to adapt them to their particular needs

Science Fiction and Computing

David L. Ferro, Eric G. Swedin, 2011-09-29 The prevalence of science fiction readership among those who create and program computers is so well known that it has become a cliché but the phenomenon has remained largely unexplored by scholars What role has science fiction played in the actual development of computers and computing And likewise how has computing including the related fields of robotics and artificial intelligence affected the course of science fiction The 18 essays in this critical work explore the interrelationship of these domains over the span of more than half a century *Who Invented the*

Computer? Alice R. Burks, 2010-10-29 In 1973 Federal District Judge Earl R Larson issued a ruling in a patent case that was to have profound and long lasting implications for the dawning computer revolution Against all expectations the judge ruled against Sperry Rand Corp which claimed to hold the patent on the first computer dubbed the ENIAC and was demanding huge royalties on all electronic data processing sales by Honeywell Inc and other large competitors The judge came to the conclusion that in fact the ENIAC was not the first computer but was a derivative of an obscure computer called the ABC which had been developed in the late thirties by a largely unknown professor of physics and mathematics at Iowa State University named John V Atanasoff Looking back today from our digital world at what was then a little publicized trial it is clear that the judge s decision had enormous repercussions If Judge Larson had ruled the other way in favor of the patent claim subsequent manufacturers of computing hardware would have had to obtain a license from Sperry Rand and the course of computing history would likely have been very different from the galloping revolution we have all witnessed in the past three decades This book centers on this crucial trial arguing that Judge Larson correctly evaluated the facts and made the right decision even though many in the computing community have never accepted Atanasoff as the legitimate inventor of the electronic computer With meticulous research Alice Rowe Burks examines both the trial and its aftermath presenting telling evidence in convincing and absorbing fashion and leaving no doubt about the actual originator of what has been called the greatest invention of the 20th century
