An Assessment of Perceptions of Attitudes of Common Ground Students Patricia Handegard Hall,1998

Saving Our Cities William W. Goldsmith,2016-08-23 In Saving Our Cities William W Goldsmith shows how cities can be places of opportunity rather than places with problems With strongly revived cities and suburbs working as places that serve all their residents metropolitan areas will thrive thus making the national economy more productive the environment better protected the citizenry better educated and the society more reflective sensitive and humane Goldsmith argues that America has been in the habit of abusing its cities and their poorest suburbs which are always the first to be blamed for society s ills and the last to be helped As federal and state budgets regulations and programs line up with the interests of giant corporations and privileged citizens they impose austerity on cities shortchange public schools make it hard to get nutritious food and inflict the drug war on unlucky neighborhoods Frustration with inequality is spreading Parents and teachers call persistently for improvements in public schooling and education experiments abound Nutrition indicators have begun to improve as rising health costs and epidemic obesity have led to widespread attention to food The futility of the drug war and the high costs of unwarranted unprecedented prison growth have become clear Goldsmith documents a positive development progressive politicians in many cities and some states are proposing far reaching improvements supported by advocacy groups that form powerful voting blocs ensuring that Congress takes notice When more cities forcefully demand enlightened federal and state action on these four interrelated problems inequality schools food and the drug war positive movement will occur in traditional urban planning as well so as to meet the needs of most residents for improved housing better transportation and enhanced public spaces
