Buxton, Stanley M. Roberts, 1996 Takes the reader step by step from the structures of simple molecules such as methane to the basic shapes of biologically important macromolecules such as proteins and nucleic acids Deals with the concept of chirality which is often overlooked by many texts Chirality is approached by firstly explaining the stereochemistry of compounds with one stereogenic centre then dealing with compounds having two or more stereogenic centres before focusing on compounds possessing axes of chirality The importance of stereochemistry in a wide variety of transformations for example addition reactions eliminations and cycloadditions is discussed The final chapters describe the application of stereocontrol in asymmetric synthesis indicating the use of chiral auxiliaries and chiral catalysts in modern chemistry **Organic Chemistry Workbook** Pierre Vogel, Kendall N. States With Answers      Orbital Symmetry Roland E. Lehr, Alan P. Marchand, 2013-09-03 Orbital Symmetry A Problem Solving Approach was born of the necessity to present to students Woodward and Hoffmann's approach to pericyclic reactions. Hence the tone is introductory and the book is addressed primarily to an audience of advanced undergraduate and beginning graduate students. The text seeks to familiarize the readers with several of the more often encountered methods of analyzing pericyclic reactions and these methods should enable the analysis of virtually all of them. Problem solving is the foundation of the approach. Both the introductory and theory sections include problems to prepare the reader for the more extensive chapters of problems that follow. All problems except those in Chapter VII are answered in the text and are fully referenced where appropriate. Many of the problems require the use of molecular models if they are to be appreciated. Prentice Hall's Framework Molecular Models and Benjamin's Maruzen Models are best suited for the construction of the highly strained molecules often encountered in the problems and their use is recommended.
