Shamans Queens And Figurines The Development Of Gender Archaeology:

Shamans, Queens, and Figurines Sarah Milledge Nelson, 2016-07-01 Sarah Nelson recognized as one of the key figures in studying gender in the ancient world and women in archaeology brings together much of the work she has done over three decades into a single volume The book covers her theoretical contributions her extensive studies of gender in the archaeology of East Asia and her literary work on the subject Included with the selections of her writing taken from diverse articles and books published in a variety of places is an illuminating commentary about the development of her professional and personal understanding of how gender plays out in ancient societies and modern universities and her current thinking on both topics Archaeology Mark Q. Sutton, 2025-01-22 Archaeology The Science of the Human Past introduces students to the wide ranging and fascinating world of archaeology and provides them with a comprehensive understanding of fundamental archaeological concepts and methods The seventh edition keeps pace with the developments in archaeological science with up to date information on dating artifact analyses and remote sensing Theoretical developments in power gender and cognition are also included Introducing the key components of archaeology including sites artifacts ecofacts remote sensing and excavation it discusses the ways archaeologists obtain analyze and interpret evidence Varying perspectives are considered to provide holistic coverage of how archaeological techniques and methods are used to formulate and test models of what happened in the past Cultural resource management and the laws and regulations that deal with archaeology around the world are described Archaeology is placed in the context of current topics from environmental problems to issues affecting Indigenous populations Archaeology The Science of the Human Past remains an ideal introduction to archaeology by offering students a broad and clear understanding of the theoretical and scientific aspects of archaeology and how various archaeological perspectives and techniques help us comprehend not just the past but the contemporary world as well **Archaeology of Domestic Architecture and the Human Use of Space** Sharon R Steadman, 2016-06-16 This volume is the first text to focus specifically on the archaeology of domestic architecture Covering major theoretical and methodological developments over recent decades in areas like social institutions settlement types gender status and power this book addresses the developing understanding of where and how people in the past created and used domestic space It will be a useful synthesis for scholars and an ideal text for advanced undergraduate and graduate courses in archaeology and architecture The book covers the relationship of architectural decisions of ancient peoples with our understanding of social and cultural institutions includes cases from every continent and all time periods from the Paleolithic of Europe to present day African villages is ideal for the growing number of courses on household archaeology social archaeology and historical and vernacular architecture **Power from Below in Premodern Societies** T. L. Thurston, Manuel Fernández-Götz, 2021-10-21 This volume challenges traditional narratives on power moving away from elite centered models and focusing instead on the archaeology of commoners *Identity, Oppression, and Diversity in*

Archaeology Laura E. Heath-Stout, 2024-10-31 Identity Oppression and Diversity in Archaeology documents how racism classism sexism heterosexism and ableism affect the demographics of archaeology and discusses how knowledge that archaeologists produce is shaped by the discipline's demographic homogeneity Previous research has shown that like many academic fields archaeology is numerically dominated by straight white cisgender people and those in positions of authority are predominantly men This book examines how and why those demographic trends persist It also elucidates how individual archaeologists' social identities shape the research they conduct and therefore how our demographics affect and limit our knowledge production on a disciplinary scale It explains how through unflinching reflection proactive policymaking and sincere community building we can build a diverse and inclusive discipline This book will appeal to archaeologists who have an interest in diversity and inclusion within the discipline as well as scholars in other disciplines who are engaged in research on diversity in academia

Gender and Anthropology Frances E. Mascia-Lees, Nancy Johnson Black, 2016-11-11 As an early reviewer wrote This is one of the clearest most concise statements on social theory in general let alone on gender that I have ever read Now updated Mascia Lees and Black continue to expertly trace how anthropologists have used different theoretical orientations to examine the nature and determinants of gender roles and gender inequality From the nineteenth century on anthropologists have used different theoretical orientations to understand the emotionally charged topic of gender With an insightful look at evolutionary materialist psychological structuralist poststructural sociolinguistic and self reflexive approaches this distinctive module also examines how these approaches best explain gender and sexual oppression in a global world The authors pack great amounts of valuable information into such a slim volume yet leave readers with digestible material that does more than cover the surface of anthropological perspectives on gender roles and stratification Readers gain insights and tools to develop their own critical analyses of gender

History and Approaches to Heritage Studies Phyllis Mauch Messenger, Susan J. Bender, 2019-01-21 This volume contributes to scholarship on the theory and practice of heritage with a focus on pedagogy It is an important collection at the intersection of theory practice and teaching This work intervenes in a broader discourse on the relevance of archaeology in education and the tensions between education for democracy and justice and the skills based economy

Subjects and Narrative in Archaeology Ruth M. Van Dyke, Reinhard Bernbeck, 2015-04-03 Seeking to move beyond the customary limits of archaeological prose and representation Subjects and Narratives in Archaeology presents archaeology in a variety of nontraditional formats The volume demonstrates that visual art creative nonfiction archaeological fiction video drama and other artistic pursuits have much to offer archaeological interpretation and analysis Chapters in the volume are augmented by narrative poetry paintings dialogues online databases videos audio files and slideshows The work will be available in print and as an enhanced ebook that incorporates and showcases the multimedia elements in archaeological narrative While exploring these new and not so new forms the contributors discuss the boundaries and connections between empirical data and archaeological imagination

Both a critique and an experiment *Subjects and Narratives in Archaeology* addresses the goals advantages and difficulties of alternative forms of archaeological representation Exploring the idea that academically sound archaeology can be fun to create and read the book takes a step beyond the boundaries of both traditional archaeology and traditional publishing

Discovering World Prehistory Mark Q. Sutton, 2022-02-27 *Discovering World Prehistory* introduces the general field of archaeology and highlights for students the difference between obtaining data basic archaeology and interpreting those data into a prehistory a coherent model of the past The opening section of the book covers the history methods and techniques of archaeology to provide a detailed examination of archaeological investigation It highlights the excitement of archaeological discovery and how archaeologists analyze and interpret evidence The second half covers global prehistory and shows how archaeological data is interpreted through theoretical frameworks to create a picture of the past Starting with human evolution chapters detail the key stages from around the world of prehistory finishing with the transition to post prehistoric societies Including chapter overviews highlight boxes chapter summaries key concepts and suggested reading *Discovering World Prehistory* is designed to support introductory courses in archaeology and allows students to experience both methods and interpretation offering a perfect introduction to the discipline

Researching the Archaeological Past through Imagined Narratives Daniël van Helden, Robert Witcher, 2019-11-26 Archaeological interpretation is an imaginative act Stratigraphy and artefacts do not tell us what the past was like that is the task of the archaeologist The diverse group of contributors to this volume address the relationship between archaeology and imagination through the medium of historical fiction and fictive techniques both as consumers and as producers The fictionalisation of archaeological research is often used to disseminate the results of scholarly or commercial archaeology projects for wider public outreach Here instead the authors focus on the question of what benefits fiction and fictive techniques as inspiration and method can bring to the practice of archaeology itself The contributors a mix of archaeologists novelists and other artists advance a variety of theoretical arguments and examples to advance the case for the value of a reflexive engagement between archaeology and fiction Themes include the similarities and differences in the motives and methods of archaeologists and novelists translation empathy and the need to humanise the past and diversify archaeological narratives The authors are sensitive to the epistemological and ethical issues surrounding the influence of fiction on researchers and the incorporation of fictive techniques in their work Sometimes dismissed as distracting just so stories or even as dangerously relativistic narratives the use of fictive techniques has a long history in archaeological research and examples from the scholarly literature on many varied periods and regions are considered The volume sets out to bring together examples of these disparate applications and to focus attention on the need for explicit recognition of the problems and possibilities of such approaches and on the value of further research about them
