Glance provides a user friendly overview of the body's defence mechanisms. Ideal from day one of a medical, biomedical or life science course, the text begins with a basic overview of both adaptive and innate immunity before progressing to applied immunological concepts which look at what happens when things go wrong and how in clinical medicine each body system can be affected by immunity. Each double page spread corresponds to a typical lecture and diagrammatically summarises core concepts in immunology through accessible schematic diagrams on left hand pages with key points concisely summarised on the right hand page. There are also self assessment essay questions so you can test your knowledge. New for this 10th edition, thoroughly updated and reorganised chapters offer greater clarity and easier understanding for those new to the subject. New chapters on cytokine receptors and Immunology in the Laboratory. A completely re-written section on autoimmunity. A brand new companion website featuring self assessment questions and PowerPoint slides of images from the book, ideal for teaching and revision at www.ataglanceseries.com/immunology. Immunology at a Glance is the ideal companion for anyone about to start a new course in immunology and will appeal to medical and biomedical science students. Perfect for exam preparation, it provides the concepts and frameworks you need to succeed in your exam.

Advanced Concepts in Human Immunology: Prospects for Disease Control Pooja Jain, Lishomwa C. Ndhlovu, 2020-08-11. This book highlights information derived primarily from clinical samples with particular reference to theoretical and scientific aspects of the human immune system. This text will focus on topics that range from host pathogen interactions in infectious disease to host immune response in cancer, allergic diseases, neuroinflammatory diseases and autoimmune disorders. The reader will also have a well rounded understanding of the behavior of the immune system with particular emphasis on the role of immunoproteomics in immunotherapy, neuroprotective immunity for neurodegenerative and neuroinfectious disease, leukemia associated dendritic cell induction of adaptive immunity, dysregulation and the role of immune checkpoint inhibitors in cancer infection as well as neuroinflammation. Taken together, the contents of this book are intended for both clinicians and researchers in academia and industry.
