To fit the engine into the engine compartment, the procedure is the reverse of the above, using the following points:

1. When lowering the engine into position, ensure that the engine is lowered into the engine compartment and not the rear of the engine. The rear of the engine is the rear of the engine compartment of the front of the engine compartment of the rear of the engine compartment.

2. Position the engine in the rear section, so that the engine is in the rear section of the engine compartment. The engine is in the rear section of the engine compartment.

3. Work the engine from the rear section into the engine compartment. The engine is in the rear section of the engine compartment. The engine is in the rear section of the engine compartment.

4. When the 1.27 mm (0.050 in.) gap has been set, replace the engine from the rear section.

5. To avoid damage to the rear of the engine (Fig. 1B), care should be taken not to compress the rear of the engine in the rear section of the engine compartment.
