To play a game right away, without reading the entire manual first, simply follow these steps!

- 1** Insert two "AA" (AM3/R6) batteries into the computer, making sure to observe the correct polarity.
- 2** Press **GO/STOP** to turn the computer on. If the unit doesn't respond, reset it as described in Section 1.1.
- 3** Set up the chess pieces in the initial starting position for a new game, with the White pieces closest to you, as shown in this diagram.
- 4** Press **NEW GAME** to reset the computer.
- 5** Enter moves by making them on the board, pressing the chess pieces down gently on the **from** and **to** squares for each move.
- 6** As soon as the computer makes a move, that move is displayed, with the **from** square flashing. Press the computer's piece down on the flashing **from** square (Square d7 in this example), and the display now flashes the **to** square. Press down on the flashing **to** square (d5, here) to complete the computer's move. That's all there is to it!

Make your next move as described above.  
Press **GO/STOP** at any time to turn the computer off.
