behaviours and to integrate them successfully into routine daily care and interaction The Dynamics of Dementia  
 Communication asks why that is What is it about communication as a human social and cognitive practice that makes it so  
 difficult to manage the disruptions caused by dementia Why is it so common to feel awkward confused or irritated when  
 talking with a person living with a dementia Why is the experience of living with a dementia so personally and socially  
 devastating What approaches to communication would work best and why To answer these questions the book integrates  
 information from a wide range of different sources covering the biological social and emotional factors associated with the  
 dementia experience New concepts and theoretical perspectives offer novel ways of thinking about the challenges of  
 communication generally and in the context of dementia Topics explored include whether it is acceptable to deceive people  
 living with a dementia and why society's failure to support people living with a dementia and their carers is so devastating  
 The final chapter suggests what people living with a dementia need if communication is to promote and protect everyone's  
 well being By providing a deeper understanding of what topples the best intentioned attempts at interaction and by  
 explaining why poor communication affects everyone involved this book sets new agendas for improving the welfare of  
 people living with a dementia their families and professional carers      **Digital Audio Editing** Simon Langford, 2013-10-01
