- Introductory paragraph (required) & Draft #2 due (optional): Thursday, May 29, by class
- Final Revision due: Tuesday, June 3, by class

Paper Format: 2800+ words; 1.5 spacing; separate title page including name, title, and date; page numbers; in-text citations and works cited in MLA form; 1" margins; visual evidence (as appropriate) with captions.

Submission Format: Electronic posting of all materials to your student portfolio as they are due (this includes title pages, reflective memos, abstracts, works cited as they are due).

Grading: This assignment is worth 35% of the overall class grade.

Recommended *Envision* reading: Chapters 6 & 7

ASSIGNMENT GOALS

This assignment has three interrelated goals:

1. To ask you to take on a sophisticated research project, working with both primary and secondary sources, on a subject related to the intersection of gender and technology.
2. To encourage you to develop skills in delivering complex research effectively in written form.
3. To help you develop skills in presenting a powerful and articulate argument about a topic, using evidence to substantiate your claims.

DETAILED ASSIGNMENT

All PWR 2 students are required to complete an extended piece of academically rigorous research writing, designed to reinforce the skills learned in PWR: research strategies; deliberate use of rhetoric; clear and forceful argumentation.

Your research paper should include an **argumentative thesis** that represents your own claims about your topic. This thesis should be supported by evidence derived from both primary and secondary research. You should utilize at least 12 sources and, as applicable, fieldwork (interviews, surveys, etc.) -- in many cases, you

A Guide to Argumentative Research Writing and Thinking Arnold Wentzel, 2017-11-09 Research is difficult. Even though students are trained in the basic research methodology skills, when confronted with research writing it feels to them as if they enter a bizarre world with its own language and conventions where it is hard to get things right. This book translates the apparent complexities of research writing into everyday ideas, language, and skills and will enable novice researchers to start overcoming the major stumbling blocks immediately. This book focuses only on the greatest challenges in research writing, specifically those that supervisors find most difficult to explain to novice researchers. These challenges include both basic and more complex skills such as finding original research contributions, establishing one's voice while drawing on other authors, turning a vague idea into a feasible research question, generating literature reviews that are original in themselves, and avoiding list-like writing when discussing the research methodology. Wentzel shows that it is easier to overcome these challenges not with lists of prescriptions that are difficult to remember while writing, but rather by cultivating an argumentative mindset. Not only is such a mindset much easier to maintain, but it offers a central point around which one can organize any difficult writing task. The book shows how to use the argumentative mindset to approach every important writing challenge. It translates all the necessary skills into jargon-free language using a variety of visuals and simple step-by-step procedures that will enable any person to read the book quickly and start writing immediately. The book is accompanied by a website containing an instructor's manual with guidance on the teaching and assessment of research writing, as well as lecture slides. *Elements of Argument* Annette T. Rottenberg, Donna Haisty Winchell, 2011-08-03

Elements of Argument combines a thorough argument text on critical thinking, reading, writing, and research with an extensive reader on both current and timeless controversial issues. It presents everything students need to analyze research and write arguments. *Elements of Argument* covers Toulmin, Aristotelian, and Rogerian models of argument and has been thoroughly updated with current selections students will want to read. It now includes additional support for academic writing, making it a truly flexible classroom resource. An electronic edition is available at half the price of the print book. Read the preface. **Logical Argument in the Research Paper** Russ Ward, 1997 *Logical Argument in the Research Paper* operates on the premise that collegiate-level writing, when cast in its most significant and sophisticated form, is argumentative. Students are shown how writers examine a potential topic, establish a stance upon that topic, defend the stance, avoid reasoning and ethical errors, and in general, say something meaningful about the topic. It also includes instruction about finding sources, gathering information from them, and correctly documenting them. However, the emphasis remains on how effective writers evaluate sources, think about the information they discover, prepare a fair and informed argument, rethink and revise the argument, and finally present an argument in its completed form. *Logical Argument in the Research Paper* will help students learn some of the reasoning processes that all writers use when composing the academic argument.

The Structure of Argument Annette T. Rottenberg, Donna Haisty Winchell, 2011-08-03 The Structure of Argument covers critical thinking reading writing and research It is concise but thorough and presents everything students need in an affordable compact format The Structure of Argument includes questions exercises and writing assignments and a full semester's worth of readings Now presenting Aristotelian and Rogerian as well as Toulmin argument it includes many fresh readings and additional support for academic writing to help students stake their claim Its emphasis on Toulmin argument makes Structure highly teachable since the approach fits with the goals of the composition course An electronic edition is available at half the price of the print book
