Discovering Science Through Inquiry: Forces and Motion Kit Kelli Allen, 2009-11-10 The Discovering Science through Inquiry series provides teachers and students of grades 3-8 with direction for hands-on science exploration around particular science topics and focuses. The series follows the 5E model: engage, explore, explain, elaborate, evaluate. The Forces and Motion kit provides a complete inquiry model to explore the laws of motion through supported investigation. Watch as students design a safe landing parachute to observe how the forces of deceleration work on parachutes. Forces and Motion kit includes 16 Inquiry Cards in print and digital formats, Teacher's Guide, Inquiry Handbook. Each kit includes a single copy; additional copies can be ordered. Digital resources include PDFs of activities and additional teacher resources including images and assessment tools, leveled background pages for students, and video clips to support both students and teachers.

Riding the Creative Rollercoaster is a pioneering new work that turns our understanding of leadership and innovation on its head. Innovation is the holy grail of growth and progress. The challenge lies in evoking the creativity and productivity of teams, functions, organizations, and even ecosystems of organizations in order to catalyze new patterns of thought and action. Nick Udall shares his passion for the future of leadership and defines a critical threshold that leaders, teams, and organizations of all kinds now need to cross in order to help shape more purposeful, innovative, and sustainable futures. In doing so, he introduces a groundbreaking set of subtle leadership skills that explicitly link innovation and creativity with specific states and qualities of individual and collective consciousness. And he challenges leaders to learn how to leverage difference, play with new and novel intersections, hold creative tension, and work with collective intelligence in order to help their teams and organizations powerfully embrace the highs and lows of the creative process. *STEM Years 4-5: Book 1* Leonie

Westenberg, 2017. This book is ideal for teachers looking to optimise STEM in the classroom. In recent times, there has been a strong call to increase the focus on STEM activities in Australian schools. By offering STEM in primary schools, it is hoped that students will operate more effectively in the science and technology-based society in which they live. This book is one of a two-set series which uses roller coasters as a means to connect students with Science, Technology, Engineering, and Maths.
