Opioid Prescribing Guidelines for Acute Pain National Academies of Sciences, Engineering, and Medicine,Health and Medicine Division,Board on Health Care Services,Committee on Evidence-Based Clinical Practice Guidelines for Prescribing

Opioids for Acute Pain,2020-02-20 The opioid overdose epidemic combined with the need to reduce the burden of acute pain poses a public health challenge To address how evidence based clinical practice guidelines for prescribing opioids for acute pain might help meet this challenge Framing Opioid Prescribing Guidelines for Acute Pain Developing the Evidence develops a framework to evaluate existing clinical practice guidelines for prescribing opioids for acute pain indications recommends indications for which new evidence based guidelines should be developed and recommends a future research agenda to inform and enable specialty organizations to develop and disseminate evidence based clinical practice guidelines for prescribing opioids to treat acute pain indications The recommendations of this study will assist professional societies health care organizations and local state and national agencies to develop clinical practice guidelines for opioid prescribing for acute pain Such a framework could inform the development of opioid prescribing guidelines and ensure systematic and standardized methods for evaluating evidence translating knowledge and formulating recommendations for practice

Material Practice and Materiality: Too Long Ignored in Science Education Catherine Milne,Kathryn Scantlebury,2019-04-11 In this book various scholars explore the material in science and science education and its role in scientific practice such as those practices that are key to the curriculum focuses of science education programs in a number of countries As a construct culture can be understood as material and social practice This definition is useful for informing researchers nuanced explorations of the nature of science and inclusive decisions about the practice of science education Sewell 1999 As fields of material social practice and worlds of meaning cultures are contradictory contested and weakly bounded The notion of culture as material social practices leads researchers to accept that material practice is as important as conceptual development social practice However in education and science education there is a tendency to ignore material practice and to focus on social practice with language as the arbiter of such social practice Often material practice such as those associated with scientific instruments and other apparatus is ignored with instruments understood as inscription devices conduits for language rather than sources of material culture in which scientists share material other than words Baird 2004 p 7 when they communicate new knowledge and realities While we do not ignore the role of language in science we agree with Barad 2003 that perhaps language has too much power and with that power there seems a concomitant loss of interest in exploring how matter and machines instruments contribute to both ontology and epistemology in science and science education
