The Global Information Technology Report 2003-2004 World Economic Forum, 2004 The Global information Technology is published by the World Economics Forum where it is a special project within the framework of the Global Competitiveness Programme The GTR is the result of a collaboration between the World Economics Forum infoDev and INSEAD First published in 2001 The global Information Technology Report has become the most authoritative and comprehensive assessment of the networked readiness of national economies around the world The Report has since expanded its coverage this year to 102 countries The Report which captures new insights and best serve as a tool for policymakers and business leaders The overall goal of the Reports is to establish a process whereby key stakeholders can evaluate progress on a continual basis *Reading Between the Lines of Corporate Financial Reports* Jacek Welc, 2020-11-28 This book provides a digestible step by step guide to reading corporate financial reports drawing upon real life case studies and examples of corporate collapses and accounting scandals and applying practical tools to financial statement analysis Appealing to a range of practitioners within corporate finance including investors managers and business analysts this book is the first to specifically address the challenges facing those who are not professional accountants and auditors when examining corporate financial reports Corporate financial reports are used widely by managers investors creditors and government agencies to examine company performance and evaluate potential risks However although seemingly an invaluable source of information for managerial decision making financial reports are often based on rough simplifications of a very complex reality With no way of avoiding deliberate manipulations and fraudulent activity these statements cannot be relied on completely when selecting stocks or evaluating credit risk and therefore poor analysis can lead to potentially disastrous investment decisions The author suggests that in order to effectively interpret corporate financial reports we must read between the lines to accurately assess a company's economic performance and predict its long term viability

World Telecommunication Development Report, 2002 **The Report: Nigeria 2012**, The Influences of Big Data Analytics Dr. Joseph Aluya, D.B.A., 2014-09-05 The theoretical framework for this book was our ground up theory of the Scope Size Speed and Skill 4Ss and Technological Situational Happenstances TSHs applied to Big data analytics With in depth research we catechized the effects of the coalesced insights from big data influencing the architectures of incremental and radical business models We discussed data inflation and the global impact of TSHs We showed how deft leadership used insights gleaned from big data analytics to make strategic decisions The big data syndrome led to Microsoft's acquisition of Nokia in our case study Our study of APPLE Corporation's use of large datasets was explicitly analyzed Leadership's failure to incorporate those contextual elements afforded by insights gleaned from big data analytics concomitant with the associated costs led to acute forms of irrational rationalism groupthink and faulty decision making We explained the statistics used to essentially describe this paradigm shift such as high dimensionality incidental endogeneity noise accumulation spurious

correlation and computational costs Significantly machine learning challenged the status quo by effectively changing the existing technological landscape To scholarly critics how would supervised and un supervised learning algorithms advance the trajectory of perspectives in applied knowledge under the umbrella of big data Further political and socio economics tied to big data was examined We recommended leaders should have a shared cognition on how to leverage analytics from large datasets for competitive advantages Most significantly leaders or managers should be cognizant of the inextricable synergies that seamlessly flow from adroitly implementing a strategy to profit from the speed size skill and scope i e the 4Ss of the big data environment conditioned by the leveraging of those transactional situational happenstances generated by increases in market volatility We concluded the algorithmic processes of leveraging insights from big data have globally resulted in a disruption of current technological pathways
