Narrative Inquiry in Early Childhood and Elementary School Stephanie Sisk-Hilton, Daniel R. Meier, 2016-08-25 As top down educational reform policies at local and national levels increasingly isolate teachers from their own professional and instructional agency and stultify children's passion for learning new techniques are needed for understanding and transforming educational practices Narrative Inquiry in Early Childhood and Elementary School Learning to Teach Teaching Well facilitates meaningful change in early years education by providing early childhood and elementary school teachers with methods to incorporate narrative into their instruction and inquiry This book offers practical strategies for incorporating narrative tools and structures into the classroom and encouraging effective conceptual pedagogical and personal avenues for engaged teaching and learning across languages and cultures The book's chapters promote a lively discussion of central tenets of narrative inquiry and illustrative examples of teachers at work with narrative and inquiry for improving their practice and children's learning

Teaching Climate Science in the Elementary Classroom Stephanie Sisk-Hilton, 2023-12-19 Discover new ways to help elementary students engage with and understand the world around them through place based hope filled learning about the causes impacts and responses to climate change This book features foundational climate concepts easily implementable activity plans and inspiring examples of student engagement Each chapter begins with a short vignette pulled from the author's considerable teaching experience in engaging students in concepts of climate change and climate justice followed by content focused sections and recommendations for student activities and projects The author provides stories of hope filled action to invite teachers to look for and reflect on similar narratives in their own communities Sample units of study for grades K 5 show teachers how key ideas from each chapter come together into an instructional plan that incorporates the three dimensions of NGSS and can fit into the broader outline of their school year This resource is an accessible tool to support any elementary educator in building their own knowledge base and integrating the important and timely issues of climate change into their classroom

Distance Learning for Elementary STEM Amanda Thomas, 2021-02-17 This practical guide outlines a vision for online and distance STEM learning at the elementary level with creative activities based on eight STEM themes Online and distance learning may sound fairly straightforward Instead of learning in a classroom setting students learn at home with the assistance of online resources But classroom learning does not always translate easily to online settings particularly at the elementary level where children should be actively engaging in activities exploration and discussion From designing a zoo to

learning to garden to exploring the night sky you'll find eight STEM lessons that are creative hands on and engaging for elementary learners. Written for teachers and parents, the book unpacks STEM integration across multiple subjects with connections to the ISTE Standards. The book also includes play-based lessons for young learners and ideas for innovative design challenges. Each of the eight lessons includes an overview of materials, resources, time, and supervision needed. Suggested resources to explore such as simulations and virtual field trips. Supplementary learning materials such as questions and quizzes. Ideas for games and reinforcement. Hands-on activities and engineering design challenges. Connections to various content areas as well as children's books, movies, and art to keep the learning going after the lesson is completed. Concluding with a model for designing online and distance STEM learning for elementary-aged children, this book will support teachers and parents in designing the types of resources and learning experiences they need for elementary students.

Complex Networks IX Sean Cornelius, Kate Coronges, Bruno Gonçalves, Roberta Sinatra, Alessandro Vespignani, 2018-02-15. This book aims to bring together researchers and practitioners working across domains and research disciplines to measure, model, and visualize complex networks. It collects the works presented at the 9th International Conference on Complex Networks (ComNet) in Boston, MA, March 2018. With roots in physical information and social science, the study of complex networks provides a formal set of mathematical methods, computational tools, and theories to describe, prescribe, and predict dynamics and behaviors of complex systems. Despite their diversity, whether the systems are made up of physical, technological, informational, or social networks, they share many common organizing principles and thus can be studied with similar approaches. This book provides a view of the state of the art in this dynamic field and covers topics such as group decision making, brain and cellular connectivity, network controllability, and resiliency, online activism, recommendation systems, and cyber security.

Towards Inclusion of All Learners through Science Teacher Education Michele Koomen, Sami Kahn, Christopher L. Atchison, Tiffany A. Wild, 2018-05-16. *Towards Inclusion of All Learners through Science Teacher Education* serves as an indispensable resource for teachers and teacher educators wishing to understand how to educate students with exceptionalities in science. This book begins with the voices and stories of the experts: current and former K-12 students with disabilities sharing their experiences in science education classrooms. The voices of students with disabilities are then connected to the work of leading experts in the area of science education for individuals with disabilities in an effort to address the goals of national reform documents by ensuring rigorous science experiences for all students. It is written in a highly accessible and practical manner, making it ideal for all educators, including pre-service and in-service teachers, teacher educators, researchers, and curriculum developers.
