Pathogenic Advances and Therapeutic Perspectives for Eosinophilic Inflammation Florence E. Roufosse, Mats W. Johansson, 2018-12-06 With the recent approval of the first eosinophil depleting therapeutic agents targeting the IL 5 pathway for treatment of severe eosinophilic asthma eosinophils and eosinophilic disorders are in the limelight Indeed setbacks during clinical development of these compounds have revealed how much remains to be known about eosinophil biology in vivo and have nurtured profuse research both on basic eosinophil biology and on pathogenic disease mechanisms in order to better

delineate the most meaningful targets for innovative therapeutic strategies On one hand variable degrees of eosinophil depletion observed in some compartments during IL 5 targeted treatment indicate that certain eosinophil subsets may not rely on this cytokine and or that other important pro eosinophilic mediators and signaling pathways are operative in vivo On the other hand it is increasingly clear that disorders involving eosinophils such as asthma are the final outcome of complex interactions between diverse cell types and mediators beyond eosinophils and IL 5 These include type 2 helper T Th2 cells and innate lymphoid cells mast cells and a variety of factors that either activate eosinophils or are released by them Although a considerable amount of research has focused on asthma because it is a common condition and because management of severe asthma remains a major challenge several rare eosinophilic disorders with more homogenous features have proven to be extremely useful models to reach a better understanding of the involvement of eosinophils in tissue damage and dysfunction and of the micro environmental interactions operating within the complex network of eosinophilic inflammation Unraveling this interplay has resulted in advances in the development of molecular tools to detect disease subsets and to monitor therapeutic responses and in identification of promising new therapeutic targets This Research Topic dedicated to eosinophilic conditions covers aspects of the biology of eosinophils and closely related cells of particular relevance for drug development reports on translational research investigating pathogenic mechanisms of specific eosinophilic disorders in humans that will likely result in significant changes in the way patients are managed and presents an overview of the current advancement of targeted drug development for these conditions with a special focus on asthma

Appealing to God or Man Nicholas J. Campbell, 2025-03-31 *Appealing to God or Man* Contrasting Barrenness and Family Death Narratives in the Hebrew Bible and Ancient Near East argues for a reevaluation of barrenness type scenes in the Hebrew Bible and ancient Near East More specifically the argument is for a distinction women in family death narratives appeal to men while women in barrenness narratives appeal to God Even the male centric epics of the ancient Near East show that women interact with the divine more during barrenness crises e g the wife s prophetic dream in the Etana myth than during family death crises e g male divine narratives in Kirta and Aqhat This distinction not only clarifies the narrative tropes but emphasizes the role of women in these crises and intersects with discussions of household roles in the ancient Near East Male and female roles in marriage and fertility drive the responses of characters in these idealized narrative worlds especially in family death and barrenness narratives

Quixotic Authority Jodi L. Wyatt, 2026-01-13 *Quixotic Authority* reveals how deeply absorbed reading was inextricable from and essential to British women s professional writing and cultural commentary from the mid eighteenth to the mid nineteenth century The trope of quixotism what we might today call fangirling had distinctly gendered implications as the female quixote was almost exclusively associated with uncritical overly absorptive novel reading and often portrayed as a self centered deluded ill educated home wrecker who must be reformed or punished But what do we make of the fact that women wrote most of the depictions of female quixotes in novels of this period Jodi Wyatt shows that authors

such as Charlotte Lennox and Jane Austen wrote quixote narratives to assert their own professional cachet as well as validate the passion and intelligence of women novel readers Harnessing the power of the genre they debunked proscriptive contemporary discourse denigrating both women and the novel This book redefines the female quixote as a fierce fangirl both modeled in fiction and embodied by her creators

Hope in Times of Crisis Marina Ngursangzeli Behera, Michael Biehl, Risto Jukko, Kenneth R. Ross, 2025-06-06 The early twenty first century has dashed hopes for a more peaceful harmonious and prosperous world order as many societies have been plunged into conflict and living conditions for many have become ever more precarious The crisis is compounded by the advance of damaging climate change that jeopardizes the future of life on earth Where can the imagination be found to meet such an unprecedented crisis This book mines one hundred years of ecumenical reflection on mission affirming the strengths of this tradition It does so in a spirit of metanoia repentance recognizing that churches and missions were often complicit in trends that have proved to be damaging At the same time it draws on elements of renewal in thinking about mission cherishing of life environmental responsibility action for justice deepening of spirituality working from a basis in ecumenical Christianity to make common cause with people of all faiths and convictions who share similar concerns While the book is unflinching in confronting the injustice and destructiveness of the prevailing world order its final message is one of hope proposing that a retrieval and renewal of the ecumenical vision holds the promise of a brighter future
