The Bible's Top 50 Ideas Rabbi Dov Peretz Elkins,Abigail Treu,2013-09-01 All the important moral ideas of the modern world are based on the key biblical verses analyzed in this collection What generally happens when someone picks up a copy of the Bible Often it is put down within seconds because readers see endless verses which turn them off Finally here is an accessible book about the Bible that focuses on its great moral principles Human beings are created in the image of God Love your neighbor as yourself You shall not stand idly by the blood of your neighbor You shall love the Lord your God with all your heart and with all your soul and with all your might Justice justice shall you pursue Dov Peretz Elkins believes that if a reader understands fifty verses of the five thousand in the Bible only 1 percent he or she will begin to grasp the essence of the Bible This remarkable explanation of the Bible shows readers how it can serve as a light that illuminates a path through the confusion and problems in their personal and communal lives The result is a life that is better and more serious a life with meaning purpose and direction The Bible s Top 50 Ideas Presents the Bible s essential ideas in readable engaging fashion Focuses on the contemporary value of the Bible Uses commentaries and explanations from sources that are modern as well as ancient Christian as well as Jewish and popular as well as scholarly Elkins not only simplifies the Bible but also demonstrates how its fundamental ideas and concepts have inspired four thousand years of civilization to follow its teachings The result is a moral legal and literary foundation that remains the basis of all democratic and principled societies to this day

The European Voter Jacques Thomassen,2005-07-28 This book provides a systematic comparative analysis of how and why voting behaviour has changed in Europe in recent decades It has been widely argued that radical changes have occurred in the how and why of voting behaviour in Europe as a result of changes in the structure of society most notably the rise in material affluence and educational attainment and the decline in religious observance and the size of the working class But most tests of this proposition have been undertaken on single countries This book however systematically tests the validity of this proposition across various European countries The argument that social change has altered voting behaviour has been increasingly challenged on the grounds that it takes too little account of changes in the choices that are put before

voters by the parties such as the promises and proposals that are put forward at election time This book therefore also assesses the relative explanatory power of claims that voting behaviour has changed because of changes in society against claims that it responds to changes in the offerings of political parties And it is clear from the analyses reported in this book that contrary to the claims of much of the extant literature the latter argument appears better able to account for many of the patterns and changes in European voting behaviour and thus the book constitutes an important challenge to much current academic orthodoxy This is the first book to provide a systematic comparison of the long term dynamics of the voting behaviour of individual voters across such a wide range of European countries taking into account the dynamics of the choices put before voters by the parties and for the first time relating this to the way voters behave Comparative Politics is a series for students and teachers of political science that deals with contemporary issues in comparative government and politics The General Editors are Max Kaase Professor of Political Science Vice President and Dean School of Humanities and Social Science International University Bremen and Kenneth Newton Professor of Comparative Politics University of Southampton The series is published in association with the European Consortium for Political Research
