The entire fish (with the exception of the fins and part of the head) is covered in scales that fit together like overlapping roof shingles. These scales protect the fish and make it hydrodynamic for easy movement through the water as it swims. The **caudal fin** is at the tip of the tail, and the **posterior and anterior dorsal fins** are found on the dorsal side along the spine. All of the perch's fins are made from a membranous structure attached to spiny rays. The rays on the anterior dorsal fin are especially spiny; be careful not to poke yourself with these
