Elaine M. Weber, Cynthia Schofield, 2013-12-27 Close critical and generative reading can be broken down into five key questions that a strategic reader must answer: What does the text say? How does the author say it? What does the text mean? What does it mean to me? What insights can I now gain? In this resource, the authors show that insight into these questions is the key to comprehending text. The authors provide tools such as mining charts, assessments, progress monitoring charts, and rubrics to strengthen the teaching and use of strategies including guided highlighted reading for craft, finding the element of argument in text, reading multiple texts for theme, and evaluating visual text. A culminating chapter provides a blueprint for creating a literacy action plan for classroom, school, and district that highlights students' growth and documents teacher effectiveness.

Organizational Learning Linda Argote, 2012-11-14 Why do some organizations learn at faster rates than others? Why do organizations forget? Could productivity gains acquired in one part of an organization be transferred to another? These are among the questions addressed in *Organizational Learning: Creating, Retaining, and Transferring Knowledge*. Since its original publication in 1999, this book has set the standard for research and analysis in the field. This fully updated and expanded edition showcases the most current research and insights, featuring a new chapter that provides a theoretical framework for analyzing organizational learning and presents evidence about how the organizational context affects learning processes and outcomes. Drawing from a wide array of studies across the spectrum of management, economics, sociology, and psychology, *Organizational Learning* explores the dynamics of learning curves in organizations with particular emphasis on how individuals and groups generate, share, reinforce, and sometimes forget knowledge. With an increased emphasis on service organizations including healthcare, Linda Argote demonstrates that organizations vary dramatically in the rates at which they learn, with profound implications for productivity, performance, and managerial and strategic decision making.
