S.p.a.r.t.a. Personal Trainer Manual Chris Lutz,2014-05-31 This philosophy of training is one of the safest and most respected methodologies used today Founded in the 1970 s it has endured the test of time and dozens of peer reviewed scientific studies Today it is used by many professional and NCAA athletic teams and is even used in the management of diseases and conditions The S P A R T A Training philosophy has proven safe and effective in nearly every demographic

proving successful for Osteoporosis patients in their 80 s professional athletes in every major sport and every one else in between S P A R T A personal trainers are experts in providing meaningful muscular and cardio respiratory exercise in an efficient time period Our approach takes advantage of the body s natural physiology Simply speaking higher quality exercise takes less time It is a common misconception that positive changes in body fat cholesterol blood pressure triglyceride levels muscular strength and other health indicators can only be achieved through long and frequent aerobic exercise It is our experience that this myth serves as a great disincentive to a healthy lifestyle These improvements can be achieved in less than 1 5 hours of significant exercise a week as recent research has shown This approach will positively impact all systems of the body including the muscular as well as cardiorespiratory Learn Common weight training terms Different muscular actions in weight training How to differentiate types of exercises Organization of routines How to moderate volume frequency intensity and duration The real function of the cardiovascular system Appropriate rep ranges Established principles Basic nutrition principles and acceptable body fat ranges Proper way to determine new client resistance Client tracking and progression models How to identify overtraining Possible exercise contraindications And MORE
