Learn the Secret to Success After nearly 20 years of teaching, Lewis Morris discovered a startling fact: Most students didn't struggle with the subject; they struggled with the language. It was never about brains or ability. His students simply didn't have the knowledge of the specific language needed to succeed. Through experimentation and research, he discovered that for any subject, there was a list of essential words that, when mastered, unlocked a student's ability to progress in the subject. Lewis called this set of vocabulary the Insider's Words. When he applied these Insider's Words, the results were incredible. His students began to learn with ease. He was on his way to developing the landmark series of workbooks and applications to teach this Insider's Language to students around the world.

NET Management (Paper-II) Study Notes , Personality Assessment in the DSM-5 Steven K. Huprich, Christopher J. Hopwood, 2014-10-29 The DSM 5 promises to be a major reformulation of psychopathology and no section is likely to change diagnostic practice more than that of personality pathology Unlike the DSM IV the DSM 5 personality disorders will be conceptualized as involving core deficits in interpersonal and self functioning and will utilize a hybrid assessment model involving both pathological trait dimensions and a limited set of personality disorder types These changes are based on empirical and theoretical work conducted during the era of DSM III IV but nevertheless there is significant disagreement among personality assessors regarding the DSM 5 proposal In this volume several members of the DSM 5 work group offer rationales for the proposal and offer empirical evidence regarding suggested changes and several personality assessment researchers critique the proposal and offer alternative conceptualizations This book was originally published as a special issue of the Journal of Personality Assessment
