### **What is Freedom**

By the literal meaning, freedom refers to having the right to think, speak or act without getting restrained or hindered. Freedom of action on a philosophical perspective means the ability to be free from hindrances (Largen, 234). These restraints are not only external barriers to our actions but also internally from addictions or physical disabilities. Politically, it refers to having the right to speak, assemble, and the government restrictions on associations, organizations, and groups, for example, the media or religion. Such are examples of external freedom. My goal in this paper is to give a further discussion on the different features that relates to freedom which includes:

**Individuality**-The freedom to create, develop and showcase the unique personality of an individual's life story both in public and in private.

**Protection against manipulation**- Captured from the symbolic manipulation where one uses other people as a means of actualizing their needs. It is a standard feature with money matters where one pays others to make their ends meet.

**Freedom to make and live in the world**-The society is an artifact where we are born not only to reside in but also to change it to our desires. It is a collaborative task to limit the abuse that can result from the actions.

In his article titled The Two Concepts of Liberty, Isaiah Berlin says that 'negative freedom,' is the lack of any constraints either internal or external. There is also another form of liberty he refers to as 'positive freedom' which raises an earlier question about the free will. One can have the freedom to act; that is being free of constraints even if the free will gets determined by the laws of nature.

### **What is Determinism**

Determinism, on the other hand, is a philosophical idea that every occurrence or the state of affairs, which includes every person's action or decision, is an inevitable and necessary outcome of a previous state of affairs (O'Grady, 16). On a stricter note, determinism should be differentiated from pre-determinism which is the notion that the entire history, as well as current and future events, is determined at the origins of the universe.

Also, neither should it be confused with determination (O'Grady, 17), which dictates that the previous events can determine events including the human activities without getting pre-determined back to the time before the individual's birth or during the origins of the universe

### **What is Consciousness**

Consciousness is the natural state when one is awake, and the mind is aware of the surroundings. It comprises of four aspects namely feeling, intuiting, sensing, and thinking (Semir, 121). The four
