Beginners Ben O Adrian, 2021-10-19 The iPhone 13 starting at 799 doesn't look very new when you first look at it. But when you start using this flagship, you realize that it offers a lot more than just a smaller notch. The screen of the new iPhone is brighter than that of its predecessor. Battery life is longer. Additionally, Apple has improved its camera with new sensors and computational photography features that make you feel like a pro even on a non-Pro phone. There's a lot more to the iPhone 13's cameras than a new diagonal lens arrangement. The large camera now collects 7% more light than the iPhone 12 thanks to a larger camera with 1.7 μm pixels. Another benefit is that the ultra-wide camera can now capture four times more scenes and its newer sensor offers better low light performance along with less noise. When it comes to taking photos, you'll appreciate the Photo Styles feature if you aren't a fan of the usual iPhone color temperature. When you use the Camera app, you have the option to switch between standard, vibrant, rich in contrast, warm, and cool styles. If you want to learn about powerful tips and tricks and how to make the most out of your new iPhone 13, get a copy of this book now.
