Human Nature and the Causes of War John David Orme, 2018-04-07 What are the causes of war Wars are generally begun by a revisionist state seeking to take territory The psychological root of revisionism is the yearning for glory honor and power Human nature is the primary cause of war but political regimes can temper or intensify these passions This book examines the effects of six types of regime on foreign policy monarchy republic and sultanistic charismatic and military and totalitarian dictatorship Dictatorships encourage and unleash human ambition and are thus the governments most likely to begin ill considered wars Classical realism modified to incorporate the impact of regimes and beliefs provides a more convincing explanation of war than neo realism *Seeking to Understand the World: Literary Journalism of Vincent Sheean* Anish Dave, 2023-05-30 Vincent Sheean a groundbreaking American foreign correspondent and author is known for reporting from Europe North Africa and Asia writing news reports articles and books A few books and articles have described Vincent Sheean s life and briefly discussed his major nonfiction books However no book length study or article has closely examined his nonfiction books Seeking to Understand the World Literary Journalism of Vincent Sheean textually analyzes his five nonfiction journalistic books to examine them for characteristics of literary journalism Spanning nearly the entirety of his journalistic career these books include Personal History 1935 Not Peace but a Sword 1939 Between the Thunder and the Sun 1943 Lead Kindly Light 1949 and Nehru The Years of Power 1960 Set in different world areas the books illuminate events as disparate as the Riffian war the Spanish Civil War the infamous Munich pact the Nazi bombing of London and the assassination of Mahatma Gandhi Sheean s books provide an in depth personal look at these and related events This book includes analysis of Sheean s works finding that they have several prominent characteristics of literary journalism stories and scenes cohesive structure lifelike characters vivid description well crafted sentences immersive reporting among others

Pageant World History Gerald Leinwand, 1990 Dear students I want to share a dream with you I dreamed that a young person of 14 whom I was going to be teaching would become president of the United States during the first half of the twenty first century As a teacher I was struck by this immense responsibility What should I teach my student about the world as preparation for this awesome task How could my world history class help this person to mature into an intelligent and humane president and leader of the free world *Republics, Nations and Tribes* Martin Thom, 1995-07-17 Covers a key time of transition in European history 1795 1848 linking revolutionary Paris to the trial of the Enlightenment The book explores the development of ideas about the citizen the nation and freedom in particular the drift from republican classical to Germanic Romantic thought **American Citizenship for Pennsylvanians** Harold Freed Alderfer, Andrew S. Livy, Book V. Livy, 1907 *The Politics of Bad Governance in Contemporary Russia* Vladimir Gel'man, 2022-07-06 In this book Vladimir Gel man considers bad governance as a distinctive politico economic order that is based on a set of formal and informal rules norms and practices quite different from those of good governance Some countries are governed badly

intentionally because the political leaders of these countries establish and maintain rules norms and practices that serve their own self interests Gel man considers bad governance as a primarily agency driven rather than structure induced phenomenon He addresses the issue of causes and mechanisms of bad governance in Russia and beyond from a different scholarly optics which is based on a more general rationale of state building political regime dynamics and policy making He argues that although these days bad governance is almost universally perceived as an anomaly at least in developed countries in fact human history is largely a history of ineffective and corrupt governments while the rule of law and decent state regulatory quality are relatively recent matters of modern history when they emerged as side effects of state building Indeed the picture is quite the opposite bad governance is the norm while good governance is an exception The problem is that most rulers especially if their time horizons are short and the external constraints on their behavior are not especially binding tend to govern their domains in a predatory way because of the prevalence of short term over long term incentives Contemporary Russia may be considered as a prime example of this phenomenon Using an analysis of case studies of political and policy changes in Russia after the Soviet collapse Gel man discusses the logic of building and maintaining the politico economic order of bad governance in Russia and paths of its possible transformation in a theoretical and comparative perspective

Abdelaziz Sulaiman Yasin,2025-07-30 The African continent has never been proffered upon the bazaar of imperial titans by its own peoples alas it has been and remains dangled for auction by those who subjugated its inhabitants ruling them through the iron fist of tyranny and terror wielded by the machinery of militarism armaments and legions sustained from the very coffers of the people s toil and the bounties of their homeland This resplendent continent teeming with the vigor of youth in the majority of its denizens is paradoxically governed by despots whose years have eclipsed eighty or seventy in the most merciful of reckonings The earth once vast and welcoming has constricted around its young in this beauteous realm casting them adrift upon shoreless seas into merciless metropolises and nations that siphon the nectar of their prime In this tome the author beseeches every government and sovereign of the magnificent continent to forge unbreakable bonds of unity charting a primordial course toward the reclamation of African dignity and exalted pride let the militarists eschew the siren call of coups d tat yielding the stage to a democracy attuned to the rhythms of their peoples and the cadence of their existence The author summons all Africans to forsake the shadows of charlatanry sorcery enchantment the veneration of the departed and the deification of the living let them pivot toward the luminous realms of science illuminating their multitudes with the radiant torch of cognitive enlightenment Elevate the stipends of educators to summits surpassing those of presidents parliamentarians and politicians those notorious purveyors of hypocrisy The author insists with unyielding conviction that no path unfurls before Africans save this to coalesce and birth the United States of Africa graced with a singular currency and a covenant of mutual defense For Africa shall be exalted by none but her own steadfast sons and daughters await not the white man nor the yellow nor ethereal visitors from the stars to exalt your stature if you do not exalt it with your own indomitable will

Science & Emotions after 1945 Frank Biess,Daniel M. Gross,2024-05-31 Through the first half of the twentieth century emotions were a legitimate object of scientific study across a variety of disciplines After 1945 however in the wake of Nazi irrationalism emotions became increasingly marginalized and postwar rationalism took central stage Emotion remained on the scene of scientific and popular study but largely at the fringes as a behavioral reflex or as a concern of the private sphere So why by the 1960s had the study of emotions returned to the forefront of academic investigation In Science and Emotions after 1945 Frank Biess and Daniel M Gross chronicle the curious resurgence of emotion studies and show that it was fueled by two very different sources social movements of the 1960s and brain science A central claim of the book is that

the relatively recent neuroscientific study of emotion did not initiate but instead consolidated the emotional turn by clearing the ground for multidisciplinary work on the emotions Science and Emotions after 1945 tells the story of this shift by looking closely at scientific disciplines in which the study of emotions has featured prominently including medicine psychiatry neuroscience and the social sciences viewed in each case from a humanities perspective *Rural roads to security* L.G. Ligutti, J.C. Rawe, 1946

Worldly Philosopher Jeremy Adelman, 2014-10-26 The life and times of one of the most provocative thinkers of the twentieth century Worldly Philosopher chronicles the times and writings of Albert O Hirschman one of the twentieth century's most original and provocative thinkers In this gripping biography Jeremy Adelman tells the story of a man shaped by modern horrors and hopes a worldly intellectual who fought for and wrote in defense of the values of tolerance and change This is the first major account of Hirschman's remarkable life and a tale of the twentieth century as seen through the story of an astute and passionate observer Adelman's riveting narrative traces how Hirschman's personal experiences shaped his unique intellectual perspective and how his enduring legacy is one of hope open mindedness and practical idealism *Freedom, Opportunity, and Security* Douglas Downing, 2015-11-05 Freedom Opportunity and Security is a book on government economic policy which will have some appeal to both sides of the political divide The book starts from basic principles to develop the case for a free economy and then presents the case for policies to provide opportunity and security However all policies are subject to the reality constraint that the average real wage equals the average level of productivity Downing's incisive analysis considers many questions in regard to economic policy For instance why Keynesians are right that aggregate demand stabilization is crucial but wrong to think that discretionary policy is the best way to achieve it He also answers why government debt could be good or could be bad depending on what it is used for and how it will be paid back He analyzes how greedy lenders caused the mortgage crisis but that greed alone cannot explain why lenders would carelessly lend heedless of the prospects for repayment Additionally he explores how concentrated economic power is a problem but there is risk that government policy ostensibly exercised to benefit the powerless can in fact be twisted to further enrich the rich Downing offers a comprehensive analysis of every level of economic policy and government structure Even when we know the best economic policy there is a problem if the political system rewards candidates who support narrow interest policies more than general interest policies This book offers strategies to improve our dysfunctional presidential nomination system and uncompetitive congressional elections *The New York Times Index*, 1929
