J. Koijen, Christian Thimann, 2016-10-28 Despite the importance of insurance in enabling individual and collective social economic and financial activities discussions about the macroeconomic role and risks of insurance markets are surprisingly limited This book brings together academics regulators and industry experts to provide a multifaceted array of research and perspectives on insurance its role and functioning and the potential systemic risk it could create The first part discusses the macroeconomic role of insurance and how insurance is different from banking and general finance Understanding the differences between the balance sheets of insurers and other financial intermediaries is essential for understanding the potential differences in risk nature and optimal regulation The second part of the book focuses on the

risks managed by the insurance sector and the potential for systemic risk The chapters discuss the risks both on the asset and liability sides of insurers balance sheets The third part of the book covers the impact of regulation on insurance companies Existing regulation is often complex and has a large impact on insurance companies decision making and functioning The chapters also illustrate the unintended consequences of various forms of regulation The book concludes with a summary of a survey that has been conducted in collaboration with McKinsey where insurance executives have been asked about the risks and regulation in the insurance sector The survey provides guidance for future research on insurance markets

Nature-Based Solutions for Restoration of Ecosystems and Sustainable Urban Development Thomas Panagopoulos, 2020-06-16

This volume examines the applicability of nature based solutions in ecological restoration practice and in contemporary landscape architecture by bringing together ecology and architecture in the built environment. Green infrastructure is used to address urban challenges such as climate change adaptation, disaster risk reduction, and stormwater management. In addition, thermal comfort, nature based solutions reintroduce critical connections between natural and urban systems. In light of ongoing developments in sustainable urban development, the goal is a paradigm shift towards a landscape that restores and rehabilitates urban ecosystems. The ten contributions to this book examine a wide range of successful cases of designing healthier, greener, and more resilient landscapes in different geographical contexts, from the United States of America and Brazil through various European regions to Singapore and China. While some chapters attempt to conceptualize the interconnections between cities and nature, others clearly have an empirical focus. Therefore, this volume provides a rich body of work and acts as a starting point for further studies on restoration of ecosystems and

integrative policies such as the United Nations Sustainable Development Goals

Financial Planning Answer Book (2009) Jeffrey H. Rattiner, 2008-11 Covering the five key areas of financial planning this guide emphasizes its technical tax and regulatory aspects The areas of discussion include investments employee benefits and

retirement plan assets insurance income tax and estate planning and regulatory issues **Covid-19 and Insurance** María Luisa Muñoz Paredes, Anna Tarasiuk, 2023-01-10 This book offers a novel study on the impact of the Covid 19 pandemic on insurance from an international and comparative perspective It assesses how insurance has to adapt to a new landscape the effects of which will last over time and cut across all areas of the field To avoid physical contact digitalisation has accelerated dramatically affecting insurance in all its phases risk selection underwriting pricing and claims settlement However the effects of the Covid 19 pandemic go far beyond that The extent to which a claim caused directly or indirectly by the virus is or is not covered by a given policy has been the subject of debate in many insurance branches The most litigated cases worldwide are those that concern damages resulting from business interruption due to restrictions enforced by the authorities in virtually every country This book analyses the rulings for and against the insured that have already been handed down by courts in various jurisdictions for example in the US Latin America Spain and Germany in order to provide guidance to the parties in future lawsuits and also to guide the courts own responses This analysis extends to the measures that governments have taken in relation to insurance during the pandemic as well as the changes that insurers have introduced in their general conditions to exclude coverage for the pandemic This response is unsatisfactory as the big question is how pandemic related risks can be covered if private insurers simply refuse to do so Solutions based on risk sharing with public entities or the use of contractual modalities such as parametric insurance are among those outlined by the authors The book was written by experts from academia and lawyers specialising in this field and written for all those interested in the field of insurance lawyers judges academics and legal professionals
