The text examines police administration from four distinct perspectives: a systems perspective, the interrelatedness among units and organizations, a traditional structural perspective, administrative principles, management functions, and the importance of written guidelines; a human behavioral perspective, the human element in organizations; and a strategic management perspective, communications and information systems, performance evaluation, strategies and tactics, and promising approaches to increasing police agency effectiveness. In addition to detailed coverage of management functions and organizational principles, the book emphasizes diversity principles and developing police agencies as learning organizations. A concluding chapter covers contemporary issues including community engagement, collaboration, globalization, racial profiling, mass media and social media, cyber crime, terrorism, and homeland security. The eighth edition includes analysis of timely matters such as technology, the police intelligence function, information sharing, interagency cooperation, and more. Each chapter is enhanced with learning objectives, discussion questions, and feature boxes.
